Democrats Seek A Wider Inquiry Into Arms Sales

By Bob Woodward

Washington Past Service
WASHINGTON — In an outbreak of partisan disagreement in Congress over the Iranian arms affair, the Senate intelligence committee voted 7-6 not to release a staff report on the panel's investi-gation into the affair.

According to a source close to the investigation, the 16-page re-port said that the committee's inquiry had produced no evidence that President Ronald Reagan was aware of the plan attributed to Lieutenant Colonel Oliver L. North, a Marine Corps officer working on the staff of the National Security Council, to use the arms sales to Iran to generate money for the Nicaraguan rebels.

The decision was made by the Republican-controlled panel that was sitting in the previous Con-

gress.
One Republican, Senator William S. Cohen of Maine, joined the committee's six Democrats in vot-

ing not to issue the report.

The ranking Democrat on the intelligence panel in the 99th Congress, Senator Patrick J. Leahy, Democrat of Vermont, said Monday that the staff report was "inaccurate and incomplete." It failed to explain, he said, why arms were traded to Iran or who in the Reagan administration knew that funds from those sales went to the Nicaraguan rebels, known as con-

Brazil Expels U.S. Bank, **Warns Others**

The Associated Press

BRASILIA — The Brazilian government said Tuesday that it had expelled Mellon Bank, of the United States, and officials warned that other foreign banks may be ordered to leave unless they "collaborate" to renegotiate the country's foreign debt of around \$103

Officials of Brazil's central bank said that Mellon had been told to leave in December because it had refused to sign a debt-rescheduling plan negotiated with other banks

"We felt that a bank that wanted only to enjoy the filet mignon here but didn't want to collaborate to reschedule the debt could not continue in the country," said a central bank spokesman, Reynaldo Fer-

"Other banks that do not collaborate could be in the same situation," Mr. Ferreira said. He declined to name specific banks.

Brazil's foreign debt, the largest in the Third World, includes about

\$23 billion owed to U.S. banks. [Melion's refusal also was criticized by senior bankers on Brazil's

advisory committee as a potentially dangerous precedent because it could sour the atmosphere of upcoming debt-rescheduling talks, Reuters reported. ["There is a moral if not a legal

obligation to keep up trade lines," a New York banker said in São Paulo.]
Mellon Bank is a division of

Mellon Bank Corp. of Pittsburgh, the 13th-largest U.S. bank holding company, with about \$35 billion in assets. It had only a representative office in Rio de Janeiro and did not operate commercially in Brazil, Mr. Ferreira said.

The conflict between Brazil and Mellon arose during debt renegoti-ations in March, when a general agreement was reached to reduce the interest rate on the \$16.5 billion of debt that was to fall due in 1985 and 1986 and to renew trade and interbank credits of about \$15.5

Mellon Bank reportedly refused to endorse the roll over of about \$150 million in short-term debts owed to it by Brazil.

Mr. Ferreira said that Mellon Bank "had not done well in the international area here and had expressed a desire to leave" even before its expulsion.

"We'd like to think Mellon was an isolated case. Other banks have shown good will in debt negotia-

Syria Alawites: Underclass to Ruling Class

New York Times Service

QARDAHA, Syria - From the coastal road below Latakia, a four-lane highway suddenly materializes, climbing up to this tiny mountain village, and then just as suddenly peters out.

The village is not much to look at: A single main street of low, stone shops on a rise in the rocky, barren bills. But near the only gas station there is an imposing abstract monument with a bas-relief of the flag of the ruling Ba'ath Arab Socialist Party thrust into a map of the Arab world with Syria at its heart.

A couple of blocks away, behind a high yellow wall, guarded by troops of an elite unit, stands the opulent palace of Qardaha's favorite son. President Hafez al-Assad.

A large communications disk is going up atop a new building, and all over these hills there is the flush of construction and prosperi-

tain range that is the home of the Alawites, the once impoverished and despised minority sect that now rules this country with an iron hand.

"The old men on the street were bent over, toothless, their skin horribly wrinkled, with worn, shabby peasant clothes," said a Western diplomat, recalling a recent visit here. "Then you saw the young men, tall and strong from a good diet, wearing their uniforms, sharply tai-lored, chatting with the girls with the easy

"There it was in a nutshell," he said, "From underclass to ruling class in a single genera-

In the Middle East, from the time of the Ottomans and before, government has been for the benefit of the governors. Ideological and class interests in this part of the world nearly always have historical roots in religious differences. Even so, the tale of the Alawites of Syria is a remarkable success story.

The Alawites, between 11 and 13 percent of Syria's roughly 10 million people, are distinguished as a social class by their religious beliefs, regarded by orthodox Moslems as hereti-

The origins of the sect are lost in tribal history, but it clearly draws on both pagan traditions and Christian ritual as well as a neavy overlay of the Shiite branch of Islam.

The most important tenet of the Alawite faith is that Ali, the son-in-law of the Prophet Mohammed, is divine, God assuming a human form, somewhat along the lines of Jesus in Christianity. This is in direct conflict with the standard Moslem injunction that "there is no

Argentine Groups Plan Thousands of Charges Against Security Forces

By Juan de Onis

International Herald Tribune
BUENOS AIRES — Thousands of new accusations of human rights violations by Argentine security forces will be filed in federal courts before the deadline for prosecutions imposed by a new law, leaders

of Argentine human rights organizations said Tuesday.
Emilio Mignone, who heads the Center for Legal and Social Studies, a legal office serving the human rights groups, said that the groups have prepared thousands of cases and will submit them Thursday to civilian courts that have jurisdic-

"The federal courts may not have time to consider all the cases before the deadline expires" on Feb. 27, "but we think there will be grounds for hundreds of prosecutions," Mr. Mignone said.

Mr. Mignone said that if the courts accepted the evidence presented as a basis for trying the accused, the trials could take place beyond the termination date for the presentation of new charges.

Leaders of Argentina's human

rights organizations and the opposition Peronist Party held street marches last month to protest the amnesty law adopted by Congress last month and signed by President Raúl Alfonsin on Dec. 26.

After a two-month period, the law forbids new charges against the military for crimes committed in the 1970s during the so-called "dirty war" against leftist guerrilla

Human rights groups have docu-mented the disappearance of 9,000 prisoners taken by the military during the conflict. In many cases,

Mr. Alfonsin, who submitted the bill to Congress, argued that the armed forces could not be subjected to an endless process of investigations and trials without being de-moralized and losing their

The federal courts have sentenced 10 senior army, navy, air force and police officers to prison

The cases are being submitted to the federal civilian courts because the military court system ruled on only one of 1,800 cases that were presented by a special commission set up by the Alfonsia government.

In that case, a navy lieutenant, Adolfo Astiz, was absolved in the killing of an 18-year-old Danish woman who died after being arrested in a military anti-subversive op-eration in 1977.

Two former presidents of the juntas that ruled Argentina after the military sezzed power in 1976, Jorge Videla and Emilio Massera. have been sentenced to life imprisonment. The sentences were confirmed by the Supreme Court last

The new cases that are to be submitted to the courts involve mainly middle-ranking officers and policemen accused of murder, torture, rape and theft. Some of the still on active duty.

Among the major cases for which charges already have been filed are those against General Luciano Menendez and other officers in the 3d Army with headquarters in Cordobs, where thousands of persons are missing and many oth-ers have been found in mass graves.

ALAWITE: Syria's Ruling Class

(Continued from Page 1) God but Allah, and Mohammed is

Ali was, Alawites believe, the seventh such manifestation of God, who each time was assisted by two men, forming a divine triad. A virtuous Alawite will be reborn after death as a star. One who is not will be reincarnated as a Moslem, Jew or Christian to try to get to be an Alawite again, but after seven lives, will become a star in any case.

Persecuted for their beliefs, the Alewites, like the Maronite Catholies of Lebanon, withdrew to more easily defensible mountaintops. They are found only there, working as tenant farmers on the plains below or in a few scattered settlements in nearby areas of Turkey

A rural people in an urban, trading society. Alawites were scorned and sometimes stoned when they came to town. Some became house servants of the wealthy Sunni Mosiem merchants of Damascus, Alep-

po, Hama and Homs. What changed things for the Alawites were two institutions: the Ba'ath Party and the Syrian Army. Ba'athism, a radical, pan-Arab ideology spreading across the Mid-dle East in the 1940s and 50s, is a secular rather than an Islamic

movement and thus had a particular appeal to the minority Alawites. Even when the party was sus-pended during the brief union with the Egypt of Gamai Abdel Nasser, Mr. Assad and other Alawite leaders kent their network alive in the Latakia branch, which later enabled them to take over the party.

ed service in what was, in effect, a colonial army. The French, however, welcomed the Alawites into the army in a divide-end-rule tactic Thus, after independence, a network of Alawites grew to a nearmonopoly in the organized use of force, the key to control.

"Many Alawites who had been able to attain a secondary education used the military academy as a means to continue their education, which otherwise they could ill-afford," writes Peter Gubser, a student of the area. "Once Alawites gained positions in the ranks, the noncommissioned officer corps and the commissioned officer corps, they encouraged their reistives, fellow tribesmen and fellow

villagers to join the military." At the same time, he said, the in an overlapping effort, "encouraged their members to enroll in the army in order to secure more power for their political group within the

country. Although in 1966 rivals were able to purge Alawite officers from the army on charges of "communal clannishness," Mr. Gubser points out that by the 1970s "all army strike units were effectively con-

trolled by Alawite personnel. With this power, they have taken over a high percentage of all authoritative positious in Syria," he

When General Assad, then the air force commander and Defense Minister, came to power in a bloodless com in 1970, ending a decade of successive coups, the Alawiter'

power was consolidated. "One look at that miserable little

FRANCE: Strikes Spread

(Continued from Page 1) time objective remained the fight

gainst unemployment. Therefore, we need social poli-cies which first and foremost will create solidarity for those who need it most, and which will encourage companies to invest and finance specific industries," Mr. Chirac

He said that the government's main task was "making sure inflation does not start up again and that it is mastered. This requires discipline and rigorous manage-

Mr. Chirac's statement came after criticism that he had not been decisive enough in dealing with strikers in recent weeks, detracting from his reputation for being a tough and efficient administrator. In a front-page headline last week, the leftist daily Liberation asked:

"Is the government on strike?" On Monday, Mr. Chirac received unexpected encouragement from President François Mitter-rand his Socialist rival Mr. Mitter-rand stressed that the fight against inflation was a priority in the strug-gle to eliminate social inequality.

Last week, Mr. Mitterrand re-ceived a delegation of striking train drivers, drawing fierce criticism from members of Mr. Chirac's conservative government that he was demonstrating support for the government's opponents. The train strike has become a

crisis for Mr. Chirac, who has refused to bow to engineers' pay de-mands on the ground that public spending must be kept down. The government refuses to envision pay raises of more than 3 percent.

The railroad management has al-ready suspended a plan to promote employees on merit rather than seniority, which had angered the en-The rail strike is all the more

difficult to control since it started Dec. 18 as a wildcat action and is rum in many of France's 94 depots by strike committees and not by the egular trade union bodies. Many of the workers on these

committees are not union members subject to union discipline. According to the railroad management, whose figures were dis-

puted by the strikers, about 40 percent of normal train services were Tuesday's one-day public sector

strike was one of a series called since last fall by the CGT, sometimes supported by other unions. Another has been called for Jan.

A CGT-organized demonstra-tion in central Paris drew 10,000 protesters, according to police, but quickly dispersed when a hailstorm

hit the city.

Mr. Chirac blamed the worsening situation on a "politicization" by the Communist-led union. This same charge was made earlier in the day by André Bergeron, the head of the moderate Force Ouvrière union, who said the stoppages were being encouraged by a Communist Party that needed to "restore its

Previous "days of action" had little impact, but Mr. Chirac's goverument has been weakened by its confrontations in December with students, who forced withdrawal of a plan to change university entrance and raise trition fees.

■ Strike Call in London Workers on London's Underground gave their union full backing Tuesday to call a one-day strike Jan. 14 over pay, jobs and condi-

tions, Renters reported.

they were viewed as a one-time gain that would divert Congress from

cutting spending over the long term. While Mr. Miller has justified them as part of a campaign to "privatize" federal functions, critics say

they are a "quick fix." The budget is filled with many other proposals, such as increase user fees for federal services, that Congress has repeatedly rejected. Mr. Reagan also is seeking deep cuts in farm spending, funda tal changes in college loans and cuts in the Medicare health insurance program that may prove unac-

ceptable on Capitol Hill. Once Mr. Reagan promised to balance the budget by 1983. Now that he cannot balance it any time in his presidency, he says that getting the deficit down to about \$100 billion would "bring it within the range of our previous peacetime experience" and "bring our goal of a balanced budget much closer to

Hanoi Cites Big Clash With Chinese

LONDON — Vietnamese troops have killed nearly 500 Chinese soldiers in border clashes inside northern Vietnam, Hanoi radio reported Tuesday.

The radio, monitored by the British Broadcasting Corporation, said Chinese infantrymen launched three attacks Monday in the border province of Ha Tuyen but were repulsed. Hanoi said it captured

tion and military hardware. "An initial report shows that we inflicted heavy losses on the enemy," the radio said, "killing nearly 500 enemy soldiers and capturing many weapons, amountain and

Inditary hardware." The countries have clashed before on their border, but reported casualties have rarely approached 500. There have been no reported

WORLD BRIEFS

3 Die in Militia Battles in West Beirut

BEIRUT (Reuters) — Leftist militias battled with machine guns and a granades in West Beirut on Tuesday, killing at least three persons in the Mosken-controlled sector, the police said.

Fighting erupted before dawn between the Druze Progressive Socialist Party and the Syrian Nationalist Social Party after gunmen in a car fined on an office belonging to the Druze party. In addition to the three persons killed, the police said, several others were wounded in the violence, which subsided about noon.

Meanwhile, three militiamen of the pro-Israeli South Lebanon Army were wounded Tuesday when a roadside bomb exploded near their post in Jeru's said-declared security zone in Southern Lebanon, incoming

Communist rebel envoys opened on Tuesday the second phase of negotiations to end the 17-year insurgency in the Philippines and agreed to limit initial negotiations to basic problems such as poverty in Israel's self-deciated security zone in southern Lebanon, security sources in Tel Aviv said. The attack occurred near the Israeli border.

The Soviet foreign minister said that a reconciliation plan proposed by the Afghan leader, Major General Najibullah, on Thursday and adopted over the weekend, was beneficial not only to Afghanistan but to its neighbors. Afghanistan is extending a conciliatory hand, Mr. Shevard-

nadze said, adding that its neighbors "will do wisely if they do not push it

South Africa Theater Chain May Close 🚯

JOHANNESBURG (Reuters) - South Africa's biggest motion picture chain, facing boycotts by U.S. moviemakers, threatened Tuesday to close its theaters in towns enforcing racial segregation of audiences.

David Isaacs, marketing director of Ster-Kinekor, said his company

had told the town council in Krugersdorp, near Johannesburg, that its two theaters would be closed by the end of this month unless nonwhites were admitted. Mr. issues would not identify the films that Ster-Kinekor was unable to purchase from American distributors. But he said that Columbia Pictures and Warner Brothers had been pressing the South Africans on the racial issue.

He said that his chain, with 150 outlets, had difficulty obtaining foreign films although less than one in 10 of its theaters were still segregated. "American companies do not want to supply movies to segregated cinemas," he said.

The committee members, voting as the 100th Congress convened, rejected a challenge by Jesse Heims of North Carolina for the position of ranking minority member. The person in that post is considered the spokesman for Senate Republi-

cans on foreign policy issues.

A commince's ranking minority member also helps represent the Senate's bipartisan majority at White House meetings on foreign policy issues and controls selection of the minority party's staff. Mr. Fielms, who had contended

that the post was his by right of semionity, did not appear for the vote. His name had not been placed

The Republican rule for commit-tees in effect since 1973 states that a chairman or ranking minority member "need not be the member with the langest consecutive ser-

Mr. Lugar declined to characterize the vote as a rejection of Mr. Helms or his conservative beliefs. "I see it as a vote of support for the leadership I've given, a vote of con-

fidence." Mr. Lugar said.
Later, Mr. Helms said he intended to pursue his challenge to Mr. Lugar before all the Republican cenators. He said Tuesday's vote was not valid because it was taken before the 100th Congress officially convened and the committee there-fore had not been duly constituted.

years later. They were named to the Foreign Relations Committee on the same day in 1979.

The North Carolina senator could have taken the committee constituents that he would remain chairman of the Senate Agriculture Committee. Mr. Helms now says that promise was a mistake because of his interest in making his mark on U.S. foreign policy.

The House of Representatives and the Senate, each facing a transition in leadership, convened at noon Tuesday. In the Senate, the Democrats, with their newly won majority of 55-45, and the Republicans met separately to iron out or-

Strom Thurmond, Republican of South Carolina, the Senate's outgo-ing president pro tempore, passed his gavel to John C. Stennis, Demohis gavet to Joun C. Stennis, Demo-crat of Mississippi. Mr. Thurmond, 84, and Mr. Stennis, 85, are the senior members of the Senate.

Senator Robert C. Byrd of West Virginia resumed the post of major-ity leader, which he had held until the contests accompanying Ronald Reagan's 1980 landslide election put the Democrats into the minority. Bob Dole of Kansas became minority leader.

The House, as expected, elected Representative Jim Wright of Texas as speaker, overseeing the 258-177 Democratic majority. Mr. Wright replaces Thomas P. O'Neill Jr., Democrat of Massachusetts, who retired.

Representative Robert H. Michel of Illinois remains the House Republican leader. Thomas S. Fo-Mr. Helms was elected to the ley of Washington succeeds Mr. Senste in 1972, Mr. Lugar four Wright as Democratic leader.

U.S. Train Ran Stop Signal

Control engines struck by an Amtrak passenger train in a collision that killed i5 persons ran through a stop signal seconds before the crash, officials investigating the railroad's worst accident said.

Joseph T. Nall, a member of the National Transportation Safety Board, said Monday that the Con-rail engineer said he saw the stop signal about 500 feet (about 150 meters) from the site of Sunday

The track switches were set to dent, Mr. Nall said.

The Assessment Press
CHASE Maryland — The three

give the Amtrak train priority. Its
12 cars and two engines were runming at about 100 mph (160 kph) when the Courail train ran through the switches, Mr. Nall said.

Amtrak is the U.S. government's subsidized passenger railroad and Conrail is its freight service. The freight train moved out from the siding "milkiseconds before the arrival of the passenger train onto

the tracks," the head of the Federal

Railroad Administration, John H. Riley, said on television. The Coornil train's signal near The engineer said he applied the the site had signified "stop" for at brakes but it was too late to stop.

AMERICAN TOPICS

Reverse Peace Corps' Is Suggested for U.S.

Over the past quartex-centu-ry the Peace Corps has sent 120,000 volunteers to work in 93 underdeveloped countries. Now the corps is proposing a new twist: a "reverse Peace Corps" of Third World volunteers who would go to the Unit-ed States to teach their native languages and work on development projects, the Los Angeles Tunes reports.

The greatest thing we could have is this reverse Peace Corps, building these bonds, these partnerships for peace," said Loret Miller Ruppe, the Peace Corps director, Mrs. Ruppe, 51, is an heiress to the Miller brewing fortune and wife of Philip E. Ruppe, a former Republican

congressman from Michigan.
Lewis Greenstein, a Peace
Corps official, said that in the early 1970s volunteers from Nigeria, Jamaica and other countries worked on American Indian reservations and in hospitals. "But," he said, "it was quashed after one year, I am told, largely because of implications it seemed to carry about American culture. We didn't want to say we could benefit from Nigerian volun-

An aide to the House of Representatives Foreign Affairs Committee said the idea "prob-ably would be greeted pretty skeptically here, even by Peace Corps supporters, who are interested in using limited funds to increase the number of volunteers sent abroad."

Short Takes

Death rates from heart disease, strokes and automobile accidents have dropped steeply during the past decade, federal health officials say. They credit this in part to less smoking, better diet, closer checks of blood pressure and the use of seat belts. But the news is not all good: Infant mortality remains at just over 10 per 1,000 live births; acquired immune deficiency syndrome, or AIDS, threatens to overstisdow other problems; and physical fitness falls short of national goals. More than one quarter of American adults are overweight and only 10 percent to 20 per-cent exercise at the level held

SAFE AND SOUND - Mike Caruso Jr., 10, waved as he and his family left the Dallas/Fort Worth Airport Tuesday after Mike was freed by a gunman who held him captive for eight hours, demanding a flight to Egypt.

necessary to keep heart and lungs in good condition.

Heavy rains in the late au-funn helped ease the effect of the South's worst drought in a century, The New York Times reports. But moisture levels remain well below normal in fields and pastures, with the start of spring planting less than three months off. So farmers are hoping for a rainier win-ter than usual. The Agriculture Department says the drought reduced tobacco production 10 percent, soybeans 15 percent, core and peanuts 33 percent and hay 40 percent.

A record \$3.63 million for a painting by a living artist was paid for a 1959 work by the American abstractionist Jasper Johns when "Out of the Window" was sold Nov. 10 at a New York auction. But Mr. Johns, who had sold the painting in 1960 for \$2,250, got not a cent of the proceeds. Senator Edward M. Kennedy, Demo-crat of Massachusetts, is pro-posing a law that would allow artists to collect 7 percent of the profit on the resale of original works that experts agree have "recognized fine arts stature."

G. Gordon Liddy says he is developing a board game for Maruca Industries of New York that pits East against West, totalitarianism against democracy. Mr. Liddy, 55, a onetime Watergate conspirator who now makes a living as a lecturer, says the Iran arms controversy should spur sales. Players on the democratic side have Congress and a free press, and these, Mr. Liddy says, can be liabilities when they don't keep secrets. "People know that the press is like the peculiar uncle you keep in the attic," Mr. Liddy said. "Just one of those unfortunate things. But Congress — they're supposed to be

Legal Battles On Fire Start In San Juan

By Kevin Klose
Washington Past Service

SAN JUAN, Puerto Rico-The first court papers have been filed in what is likely to become a protracted legal battle following the fire at the Dupont Plaza Hotel that killed 96 people on New Year's Eve.

"Reports are widespread that a multitude of attorneys" have landed in Puerto Rico or are headed here to press claims against the hotel, lawyers for the hotel said Monday in a petition filed in U.S. District Court here. They asked that access to the hotel be carefully controlled by a judge to ensure the integrity of evidence.

John Coale, a partner in Coale &

Kananack, a law firm in Washing-ton, D.C., specializing in damage claims suits, said he filed a motion on behalf of a client injured in the fire, the first step in a move to obtain a court order to have the evidence preserved.

Some of the most prominen negligence attorneys from the United States are in the commonwealth "for the long hanl," as one of them said Monday. Many are longtime adversaries who have represented opposing sides in other

The family of Juan Rosario Torres, 63, who worked at the hotel, is seeking \$9 million in damages. The suit alleges that Mr. Torres suffered greatly before his death because of the "intentional, negligent and careless acts of the defendant."

The suit also accuses the hotel of "closing and sealing the casino doors and entrapping the dece-dent." Hotel officials have denied that the casino exits were locked at the time of the fire.

The suit names as defendant Hotel Systems International of Santa Monica, California, which atterneys for the plaintiffs said owns the San Juan Dupont Plaza Corp. of Delaware.

A second suit, seeking \$10 million in damages, was filed by José Aponte Rodriguez, also of Puerto Rico, who was in the casino when the fire broke out. Mr. Aponte had a concussion and his ankle was bro-

Making Things Worse

tions will be held for the all-white House of Assembly, the only one of the three racially segregated chambers of Parliament that matters. The election, which under the constitution could have waited until 1989, will probably be in April.

Last year was not a good one for Mr. Botha or for South Africa. There has been unprecedented violence. Black opposition, going far beyond any of the government's expectations, has made the huge black townships ungovernable. Repression and a clampdown on the foreign and domestic press have deepened Pretoria's isolation but failed to cow the blacks. The U.S. Congress, overriding President Resgan's veto on sanctions, signaled a basic change in the mood of governments and public opinion in the West. Acceptance of the African National Congress has grown both inside South Africa and in Western countries; U.S. Secretary of State George Shultz and British Foreign Secretary Sir Geoffrey Howe both have plans to confer with Oliver Tambo, the ANC leader, in the near future.

Mr. Botha may be right in assuming that his ruling National Party will emerge with an increased majority in the House of Assembly. But he knows that the parties of the hard-line Afrikaner right are on the move and that the pro-reform liberal

President Picter W. Botha is turning to opposition is on the defensive. There is South Africa's white electorate in a bid to some reason to be suspicious, therefore, reassert diminished authority and recomp when he says the purpose of the election political initiative lost in 1986, at home is to measure white attitudes toward raand abroad. He has announced that elec- cial reform. He must have a pretty good idea of what those attitudes are.

It is hard to see what good could come from this election. President Botha once seemed to have a policy for slow - too slow - reform of the system of apartheid, which he called "outdated" at the start of 1986. A few months later he shelved all plans for limited reform and opted for a policy of confrontation. Since then it has become increasingly clear that the issue in South Africa is no longer one of limited power sharing with the white minority keeping its supremacy while giving up a small portion of its political and economic power to the black majority.

Black South Africans demonstrated in 1986 that they are no longer willing to accept less than majority rule. Radicalization of blacks has been matched by the emergence of a right-wing white back-lash. Polarization can only be heightened by the electoral campaign and its after-math. The only steps that could have relieved tension and pulled the country back from the brink of catastrophe release of Nelson Mandela, lifting of the ban on the ANC and the start of talks between the latter and the government have now even less chance of being taken. The rush toward all-out confrontation is apt to gather even more speed.

INTERNATIONAL HERALD TRIBUNE

If Not Now, When?

Cultural convergence: It is the proposi-tion that, for all the Soviet-American hosti-ity, the advance of technology and the com-plexity of modern civilization are steadily making the two nations more similar. The ides has superficial appeal given the emer-gence in Moscow of Cardin fashions in the shops, news briefings in the Foreign Ministry and hard rock in the arenas.

It is also evident, say what you will about evil empires and capitalist conspiracies, at the level of oratory. The New York Times recently published key passages from a re-markable talk last June to a group of Soviet writers by Mikhail Gorbachev. The society is ripe for change," he said. "If we step away, the society will not agree to a return. The process must be made irreversible. If not us, then who? If not now, when?" The thought struck some readers as fa-

miliar, perhaps even American. One of the Kennedys, maybe? Not exactly. The recent source is President Reagan, in his second inaugural address, just two years ago. He was talking then, as now, about the need to end decades of deficit spending:

"We've come to a turning point, a mo-ment for hard decisions. I have asked the cabinet and my staff a question, and now I put the same question to all of you. If not us, who? And if not now, when?

That, however, is only the recent provenance. Questions like these have reverberated for 20 centuries, since Rabbi Hillel asked, "If I am not for myself, who is for me? If I care only for myself, what am I? If not now, when?" More than complexity or technology, there are grounds for convergence in those questions, all three of them. - THE NEW YORK TIMES.

Reagan's Budget Poker

and taxes; or (b) the beginning of a poker ame with Congress over who gets the creditor spending and the blame for taxes?

The usual answer is both, but not this a Jan. 5 deadline and be has complied only game with Congress over who gets the credit for spending and the blame for taxes?

time. The 1988 budget, President Reagan's technically by submitting a summary. Parseventh, is such a pallid, temporizing ver-ticulars are to follow but there are some The best that can be said about it is that, where it might have been beligerent, it makes modest concessions to the Demomakes modest concessions to the Democrates' new control of both houses of Congress. It is vintage Reagan, only less so.

the spiraling costs of some major entitlement programs—farm subsidies, Medicare and Civil Service pensions. While he con-

gress. It is vintage Reagan, only less so.
After four years of modest growth, for which the president claims immodest credit, his is a sorry vision of what a prosperous nation should provide. He still wants to pump up Pentagon spending, but not so much. He still stands firm against tax increases, but perhaps not quite so firm. He still wants to minimize government and reduce social spending, but maybe not so tenaciously. Most important, he insists he wants to reduce his huge deficit — but proposes no plausible political strategy to achieve that goal.

The president is probably correct in saying that the deficit is shrinking, but wrong in calculating how much. Only three months after Congress finished work on the 1987 budget, the deficit will be almost \$25 billion larger than previously thought.

Now, by assuming that the economy will prow faster than most forecasts, Mr. Reagan pretends his plan for fiscal 1988 would yield a smaller deficit than is likely. Moreover, he tosses in "savings" that he knows Congress will not accept. He may devoutly

What is a federal budget: (a) a realistic wish to reduce farm subsidies or eliminate blueprint from the president for spending and taxes; or (b) the beginning of a poker Congress has turned him down each year.

does not propose increasing defense as much as in the past. He grapples at last with tinues to insist, wrongly, that any "tax increase" is out of the question, he proposes to raise revenues by \$23 billion.

There are also some small signs of social concern: limited funding for the homeless ... more money to retrain displaced workers ... increases for AIDS research and reducing infant mortality among the poor neutrong meant mortality among the poor ... hesitant steps against acid rain. But in many more ways, this budget would chip away at programs that help the disadvantaged, directly and through strapped municipalities. He blames the deficit for such stringency and brags of at last making headway to get the deficit down — without

pentioning whose administration got it up.
This budget is Mr. Reagan's first commisnication with the new Congress. The language is carefully tempered; he seeks no confrontation, his spokesmen insist. But neither does he offer a plausible program. The budget is the president's time to lead to take responsibility, to bet his poker hand. With this budget, Mr. Reagan says, I pass. -THE NEW YORK TIMES.

The Wars of One World

Two wars, Lebanon apart, have racked the Islamic world since the beginning of this decade, and only one shows signs of reaching its natural term. The arrival in Kabul of two senior Soviet politicians reinforces the cease-fire initiative announced by the country's nominal leader, Dr. Najibullah. In Iraq, meanwhile, they are celebrating as a famous victory one more episode in the toand-fro of hugely wasteful infantry attacks. Not the least difference between the two wars is that the one in Afghanistan is a serious emberrassment to a superpower the bleeding wound, Mr. Gorbachev called it - and the other is one that both superpowers can contemplate with consuit

The United Nations has been actively occupied over several years in searching for an Afghan peace formula and has almost found it. The only remaining hurdle — at the negotiating table at least — is the date of a Soviet withdrawal, and obviously that cannot be decided until all the other elements have fallen into place. In the Gulf

War there are no effective mediators. The Gulf War is the more intractable [of the two conflicts] and by far the bloodier. At first it seemed likely to have the wider repercussions in cutting an artery of oil. But that has not happened. Mr. Shevardnadze, [the Soviet foreign minister], is in Kabul to tackle a soluble problem. For the time being the Gulf War is not in that category. - The Guardian (London).

OPINION

Where did we go wrong? '

On Cue or Not, China's Students Start Something

By Merle Goldman

B OSTON—In reports about the student demonstrations in China, too little has been said of the restraint shown by the Communist Party. Given its tremendous power, China's one-party state could easily have nipped these demonstrations at the very beginning. Even as party leaders harshly de-

nounced the demonstrators, they allowed a protest for a more open nominating process to people's congresses to expand into a general demand for competitive elections and freedom of speech. The demon-strations spread for at least four weeks to major cities. There are several reasons for the

party's relative tolerance, including its desire to project a moderate im-age abroad, memories of the Cultural Revolution, a desire not to prowoke another reign of terror by cracking down too harshly and, most important, the fact that the demonstrations serve the interests of certain factions at the top levels of political leadership in ongoing bates over reform,

his reform faction have called for political reforms to accompany economic changes. They argue that China's openness and economic deins reform faction have called for political reforms to accompany eco-nomic changes. They argue that China's opezness and economic de-velopment cannot be sustained un-less the party decentralizes its pow-er and reduces its role in economic

management. Their attempt to gain acceptance of such a proposal at a Central Committee meeting in Sep-tember was blocked by conservative leaders led by Chen Yun, the Politburo member and economic plan-ner. The final resolution talked about building socialist spiritual civilization rather than reforming the political system.

Yet the debate on political reform continues, and it encompasses more radical suggestions. Some intellectuals say political reform should not be merely a tool of eco-nomic reform. Others urge the party to lessen its role not only in the economy but also in the judiciary, the government and everyday life.

Although these recommenda-

Since the spring of 1986, the par-amount leader, Deng Xiaoping, and for more far-reaching reforms than

This is not the first time they have done this. In the late 1970s they let the so-called Democratic Movement use wall posters, pamphlets and demonstrations to force out remaining Maoists in the central leadmaning plants in the central rec-ership and to launch their own eco-nomic program. When Mr. Deng's goals had been achieved, he cracked down on democratic activists.

A similar scenario may be unfolding today. To bring about limit-ed political reform, the Deng leadership may have allowed student demonstrations to spread - before gradually suppressing the protests.
If the demonstrations became too disruptive, the conservatives could use them as an excuse to call for an end to or even a reversal of previous reforms, as they tried to do
in the "spiritual pollution" campaign in the fall of 1983.

While the top leaders may be able

their own purposes, almost invari-ably the protests set in motion ideas and actions that the leadership cannot wholly control. In a similar fashion, Mao Zedong used the Red Guard demonstrations during the Cultural Revolution to purge the opposing political faction. His call "to rebel against authority" led to anarchy, which he finally suppressed with violence. But it also ltimately led to the Democratic

Ideology

By Flora Lewis

PARIS—This week, French com-mentators say, will be decisive in determining if the government can weather the current storm of labor

protest or if it will face upheaval with

Jacques Chirac's stern refusal to

budge on demands from striking railway workers has been compared to Romald Reagan's harsh stand against air traffic controllers and Margaret

Thatcher's success in breaking the

coal miners' strike. These turned out

to be watersheds for union power, and Prime Minister Chirac is going

for a similar victory.

The Communist-led CGT, the

largest union, and the Communis

Party are scarrying to catch up with the wildcatting workers and to pro-vide leadership with a call for a three-day general strike in the public sec-tor. They are not likely to succeed.

The Communists' approach to social problems and their basic idea of class struggle are widely seen as obsolete. But there is a general mood of irritation with government policy.

The ommous sense of trouble

shead comes from two layers of dis-satisfaction far broader than those

specific demands. One concerns austerity, which has brought inflation down sharply in four years. Workers feel they have sacrificed long enough

and it is time for rewards, although no one wants to restart inflation.

The other, more vague, perhaps more profound resentment is that wage and other restraints are now

accompanied by measures meant to liberalize the whole structure of the

French economy, in the 19th century

Tax cuts for the wealthy and moves

diluting the government's role in pro-tecting workers are seen as an ideo-logical campaign that goes well be-youd what is needed to regain eco-

nomic vigor and spark enterprise. Even former President Valery Giscard d'Estaing, a man of the centerright, said there "can't be good economic liberalism without a social

conscience, because France is sensi-

tive" about these things.
Former Prime Minister Pierre

first and second class."

Mauroy, a Socialist, charged that the government wanted to organize the country like a French train, "with

Nor can France apply its kind of

Reaganomics by piling up vast defi-tits and debts, because it cannot at-

tract endless foreign funds, as the United States has. Interest rates were

raised twice last week in hopes of heading off a run against the france that could force devaluation. In a peculiar way, Mr. Chirac is making the mistake that his Socialist

predecessors made when they won power in 1981. They thought they had a mandate for an ideological pro-gram, and they shoved it through. So did Mr. Chirac when his rightist co-

alition took over last March. But in

simply turned out a government it

act a price in public confidence.

fact both times the el

sezious economic consequences.

Movement of the late 1970s.
Although Mr. Deng initially used the Democratic Movement for his own purposes, he, too, remed in the activists when they demanded more democratic rights than he was will-ing to allow. Yet their demands have stimulated the current debate on political reform. China's recent history suggests that demonstra-tions, manipulated to exert pressure on top leaders, spark ideas and practices that the manipulators cannot fully extinguish.

The writer, professor of Chinese history at Baston University, contributed this comment to The New York Times.

Last-Ditch Remedies for an Ugly American Decade

CORAL GABLES, Florida — It looks as if the 1980s may be remembered as the ugly decade. We have witnessed in America a kind of general know-nothingness in which evading critical prob-lems is a substitute for grappling with them, in which damage-controlling an error is better than avoiding it, in which sitting tall in the saddle is preferred to riding forward, and in which, amid the verbiage, certain essential freedoms and equalities of national life are diminished and evoded.

sident Rea trations have produced a massive budget deficit which, if allowed to grow untended for two more years, would modify the national structure.

I have watched three other nations — Germany, Japan and Brazil — incur so much debt that then only solution was to debase their currency, wipe out the debt and damage grievously the middle class. The very rich and the very poor are not seriously burt, since the rich can afford to lose and the poor have nothing to lose. But the middle is crushed and sometimes never recovers.

Meanwhile, the fortunes of the poor, the minorities and students have suffered reverses so grievous that the United States is in danger of los ous that the United States is in danger of losing its reputation as a haven. It is becoming a society in which advantage is to the rich, disadvantage to the poor. Night after night I hear administration spokemen reason that, since the Dow Jones average has risen another 10 points, all is well with the republic, ignowing the fact that oilmen in Louisiana are wallowing in bankruptcy and farmers in Iowa are losing their farms. As I listen I recall Oliver Goldsmith's reflection on his deserted village. iver Goldsmith's reflection on his deserted village:

Ill fares the land, to hast'ning ills a prey. Where wealth accommutates, and men decay.

During this decade, the accumulation of wealth has been deified. Ivan Boesky becomes the protoBy James A. Michener

typical financier, and the takeover artist who can orchestrate a greatmail coup has become a more lauded hero than the manager of a corporation that is hiring people and making a usable product. The ugliness of the decade crops up everywhere.

A former secretary of the interior, James Watt,
denigrates America's national heritage of parks
and open lands. Attorney General Edwin Messe strives to rewrite the constitutional pattern. Ultraconservative religious forces are encouraged to run wild. The public school system, one of the reasons why America became a superior society, is threatened. Under the banner of protecting home and family, government invades the bedroom.

At this unpropitious moment, the Reagan ad-

inistration shoots itself in the foot with its handling of the Iranian hostsge crisis, selling arms to a proclaimed enemy and illegally funneling the pro-fits into the murky situation in Central America. There is disillusionment at home and scorn abroad. For the first time that I can recall in my

work abroad, other nations laugh at Americans.
I hope things can be repaired. Since 1960, America has not treated presidents well. John Kennedy was murdered, Gerald Ford shot at twice, Lyndon Johnson run out of office. Richard Nixon resigned, and if Ronald Reagan is emasculated, America will appear to the rest of the world as just one more banana republic. Mr. Resgan's unmatched popularity is an asset that must not be casually wasted.

First, the president can stand before the people and say: "I allowed an error to occur. I have corrected it. And I won't let it happen again, for I obey the laws and traditions of this nation."

control of those best qualified to conduct it. Cow-

verbalisms. The United States faces serious proo-lems. If in his next State of the Union message he claims that it is still standing tall or that it is once again respected throughout the world became of its victory in Grenada, Congress is going to wince and listeners abroad will guffaw. Further ridicule

says that he is a humane man who cares as much for the poor and the middle class as for the rich. Sixth, he should wrestle honestly with the deficit and not rely on legardenain. The government should raise taxes and cut spending. (But since Republicans refuse to do the former and Demo-

crats are unable to do the latter, I suppose we will stagger along toward a major devaluation.) Seventh, everything the Republican leadership does in the next two years, and all the behavior of the Democratic Congress, ought to point toward a smooth, responsible transition to the next adminis-tration. Last October it looked as if that adminis-

The ugly decade is drawing to a close. I hope President Reagan can regroup his forces and end his spectacular incumbency in orderly fashion. But

This is adapted from comment contributed by Mr.

control of those best quaimed to consent it. Com-boys in the White House cellar must be reined in. Third, he should disband his damage-control squad. If error is promptly admitted and rectified, no cleamup squad is needed.

Fourth, he must knock off the windy macho verbalisms. The United States faces serious prob-

is something America cannot afford.

Fifth, he must let it be seen in all he does and

tration would be Republican, but that party's debacles make its victory less automatic.

he can achieve this only if adventurism ends, only if sensible controls are established and only if the people are addressed in words of common sense.

Second, he must return foreign policy to the Michener, the novelist, to The New York Times.

Let Politicians, Not Academicians, Run Foreign Policy

WASHINGTON — It is not my W tendency to come to the sup-port of President Reagan; I am not, I imagine, commonly identified with such effort. I would, however, like to break with past practice and applaud his decision to have an investigation of the National Security Council and, more especially, the sound instinct that caused him to assign to the task two former members of Congress.
This investigation is not called for

by recent developments alone; it is long overdine. I plead, accordingly, that it not be confined to the Iranian-Nicaraguan disaster. No segment of the government over the last 25 or 30 years has had such a record of error verging, on occasion, on folly.

Some of that error has been the

original inspiration of the Pentagon, the State Department and the CIA. A larger share has come from the for-cign policy staff in the White House itself. And, in any case, it was and remains the responsibility of the president's advisers (as well, to be sure, as the president) to identify and arrest error. This they have not done; re-peatedly it has remained for Congress and the press to expose unwise and profoundly damaging action.
The list of mistakes, all in retro-

spect now so recognized, is formida-ble — the U-2 flight before the Paris summit meeting; the Bay of Pigs; the pressure for a "surgical strike" at the time of the missile crisis, this one happily forestalled against his advisers counsel by the president himself; the progressive and enduring tragedy of Vietnam; the secret bombing of Cambodia: the tracic, but also ludicrous, helicopter rescue adventure into Iran, which was a columnating step in returning President Jummy Carter to Plains, Georgia.

By John Kenneth Galbraith

Latterly there have been the dispatch of the marines to Lebenon, and now this from and contra foul-up, with numerous and bizarre aspects that, despite no slight effort to the contrary, are still coming to light. To compile the list is surely to show that something has been markedly wrong. In these days much has been attributed to the unlicensed activities of military personnel — Vice Admiral
John Poindester and Lieutenant Colonel Oliver North — and to the takehold tendencies of Donald Regan,
which left him, nonetheless, in igno-

rance of what was going on.
But my fellow academicians, the admitted foreign policy specialists, have not done better, by any conceivable measure of error, that in Indochins in particular, they have done worse on a much larger scale.

Presumably the president needs national security advisers; there must be review and coordination of policies as these emerge from the several departments. What is the remedy? The remedy is to place foreign poluntries, in the hands of experienced polinicisus. From that experience will come a sense of what Con-

gress and the public will accept. Such individuals are also less likely to be attracted by the short-run charm of secret operations; they know from hard experience that in the United States nothing of any real interest ever remains secret.

They will communicate easily with their former colleagues in Congress, have their trust and - an important matter - have respect for the laws that emanated from the body of which they were once a part.

Above all, they will not have the sense of high foreign policy and military adventure that my scholarly friends and lately the military officers. have too often brought to their task. Nothing better dulls that sense than

tedious, experienced political service.
The use of members or former members of Congress will also help ensure a needed continuity in policy

the toning down of what a foreign
diplomat of my acquaintance has
called the coup d'état that every four or eight years characterizes the shift from one presidency to the next. The United States does not have

a parliamentary system, Recruitment of top foreign policy personnel from Congress would imitate one of that system's best features. To the extent possible, senior legis-

lators should be persuaded to leave Congress to accept high foreign policy posts. To the extent this is not possible, the White House, as well as the foreign policy departments, should be a natural assignment for those who have ceased to serve on foreign policy on Capitol Hill. The present disaster would not

have occurred if Charles Percy or Howard Baker, both Republicans, had been in charge. If William Ful-bright had been there, there would have been no Bay of Pigs. And he would have resisted the steady movement into the sinkhole of Vietnam. In the past, John Sherman Cooper, Kenneth Keating and others have gone from Congress to be ambassa-

dors. Better that they should have gone to the White House. For six years Mike Mansfield has been serving the present administra-tion in Japan. Does anyone doubt

mry Carter's drafting of Edmund is a model for future action.

I am not suggesting indiscriminate recruiting from Capitol Hill. My enthusiasm for Jesse Heins, and perhaps also Paul Laxalt, is restrained. What I do urge is that we put experienced politicians in charge of foreign policy, with the not surprising quali-fication that they should be the best.

Bhopal, the shuttle Challenger, Cherno-byl and other technological horror stories tell of a cancer growing on our values. These engineering disasters are the results of willful actions, yet these actions are generally not seen by engineers as morally wrong. They are judged to be ordinary. And some engineers now espouse a morality that rejects the idea that they have as their prime responsi-bility the maintenance of public safety.

What is this new morality of engineer-ing? Can it be justified morally? If not, has modern culture become some sort of technological Sodom and Gomorrah, with no one protecting the public?

Debate on this issue rages in the liter-

ature, in the courts and in conversations among America's 1.3 million engineers.

by their Lebanese captors in "retalia-tion" for the U.S. aggression against Libya. Members of the Kilburn family, still in mourning, took the time to attend the university rully to announce that Mr.

Kilburn had gone to Beirnt because of

his dissatisfaction with U.S. policy in the

Middle East. They made it clear that his death should not be viewed as a justifi-

cation for the very policies be opposed. If Mr. Kilburn died a marryr, then he

died a martyr to the cause of peace in

Lebanon and not for the cause of Ameri-

ca's perceived interests in that country.

United States and fewer of the Reagan-Rambo persuasion, we probably would not be dealing with a "hostage crisis"

in the first place.

LETTERS TO THE EDITOR as proposing that the United States stop

Why Not Yellow Ribbous? Regarding "Against the Yellow Ribbon vndrome" (Dec. 2) by Mike Royko:

Mr. Royko fails to reason that expatriates are here, or elsewhere, because they are needed. Would he sever diplomatic relations? Does he advocate the removal of all foreign military installations? Of the foreign educators, religious orders, volunteer agencies and the busi-nessmen who are the slim hope of better conomies in many countries?

I assume that the old lady Mr. Royko mentions, who was mugged in her Chicago kitchen, at least had the sterling stance of the Chicago police force. We who live abroad may not have the privilege of such expertise.

We are merely Americans doing our jobs. God forbid that we disturb the tranquility of Mr. Royko — or of Mark Heller, the Cornell professor he quotes

assuming responsibility for expatriates taken hostage — with the misfortune of our being kidnapped. SANDRA LASKEY.

As a Chicagoan, I have always enjoyed Mike Royko's columns. However, his recent one, "Against the Yellow Ribbon Syndrome" (Dec. 2), provoked a disturbing letter from Peter Adams (Dec. 12). Mr. Adams's statement that people "who insist on going to trouble spots for private reasons get what they deserve" recalls an incident that de-serves to be related.

In April, a rally was held at the University of California at Santa Cruz to protest the Reagan administration's rash decision to bomb Libya. Following the bombing, two British nationals and an American, Peter Kilburn, were killed

Christian-Jewish Dialogue: First Expurgate the Fathers

There is truth and wisdom in Dean Richard Harris's views on relations between Christians and Jews (Other Comment. Dec. 24). Yet the main point for a dialogue is not the need for a Christian to feel "the full force of the attraction of Judaism" and vice versa. An essential condition is to eradicate the awful fabric of anti-Semitism developed through 20 centuries of Christian teaching of contempt - millennia in which the cross and the sword, allied by the strength of the secular arm in most Christian nations, persecuted defenseless Jews with humiliations, plunder, pogroms, depor-

tation, slenghter and crossdes. Separation of church and state has put an end to official hostility against Jews in many countries, but anti-Semitism on religious and racial grounds per-sists. In our own times, charch-inspired anti-Jewish feeling helped provoke the most monstrous holocaust in human his-

tory, amid general indifference. Thus, a genuine dialogue between Christians and Jews cannot occur until the doctrinal roots of anti-Semitism are extirnated and its fomenters among the Church Fathers are unbolted from their pedestals in the Christian hagiography. However, churches are paralyzed by a paradox: Many among the founding fathers of Christian doctrine are also the pillars of anti-Semitism.

LEON ALHADEFF.

By Taft H. Broome Jr. This is the first of two articles.

The debate is largely over four moral codes: Cicero's stipulation of public welfare as the paramount value, and three rival points of view.

The most defensible moral position in opposition to Cicero is based on revolutionary ideas about what engineering is. It assumes that engineering is always an experiment involving the public as human subjects. It suggests that engineer-

MEANWHILE

ing decisions are always made with insufficient scientific information.

In this new view, the risks taken by people who depend on engineers are not merely risks over some error of scientific principle. More important, and inevita-ble, is the risk that the engineer, confronted with a novel technological problem, will incorrectly judge which precedent that worked in the past can be

accessfully applied this time.

These moral ideas go to the heart of understanding how we arrived at the technology that surrounds us.

Most of the codes of ethics adopted by engineering professional societies ree with Cicero that the engineer shall hold paramount the safety of the public. But undermining this is the conviction of virtually every engineer that risk-free engineering can never be achieved. So public safety can never be guaranteed.

A noteworthy exception to engineers' reverence for Cicero's code is that of the Institute of Electrical and Electronics Engineers, the largest of the engineering professional societies in America. Its code includes Cicero's, but adds three other imperatives opposing him, without giving a way to resolve conflicts between these four paths.

The first imperative challenging Cicero's approach is called the "contractarian" code. Its advocates note that contracts on paper exist between engineers and their employers or clients. They deny that any contract exists, implied or

explicit, between them and the public. The first principle for adherents of the contractarian code is the honoring of "real" contracts, leaving the safety of the public to their employers, or clients, When engineers fit the Ford Pinto's

tor" in his Dec. 26 column, "Two More Years: Reagan's Age Is an Issue Again," to infer that Mr. Reagan or anyone else gas tank with insufficient protection to survive rear-end collisions, or when engineers at Chernobyl adhered to specifications for the plant that did not include a containment structure to keep radiation from spreading in case of an accident, or when Morton Thiokol engineers reported the O-ring defect to their superiors rather than to the astronauts, defcrence was given to the contract imperative, rather than to the public safety. But the contractarian imperative is

recent elections. All Mr. Reston has flawed by two contradictory sentiments. The first denies outright that the problems with modern technology are done with his article is to take a cheap the responsibilities of engineers. In his 1976 book "The Existential Pleasures of Engineering," Samuel Florman suggests that the responsibility lies with the public. It is they, he argues, who "commissioned engineers to invent" technology.

The other sentiment is that engineers, as professionals who alone possess the highest degree of expertise for controlling technology, are subject to a Nuremberg-like principle: Regardless of what one's contracts with employers or clients may stipulate, or what public law may say, professionals are personally responsible for the effects their practices have on public health and welfare.

This leads to the second moral position in opposition to Cicero's position: the "personal judgment" imperative. Its advocates hold that in a free society the interests of business and government are always compatible with, or do not con-flict with, the public interest.

There is only the illusion of such con-flicts, they argue, owing to the efforts of self-interest groups; or of the business or government persons who act unlawfully in their own interests without the knowledge and consent of business or government; or of reactionaries impassioned by the loss of loved ones or property due

to business-related accidents. The central question for "personal judgment" adherents is: In what mea-sure shall the interests of the public, business and government be served? Shall engineering work always secure business profits? In the case of the Ford Pinto, that would mean that business would be allowed to atone for its technological mistakes with lawsuit pavoffs payoffs which may not be severe enough

to discourage incompetent engineering.
To deal with these questions, "personal judgment" advocates urge engineers to achieve balance in the degrees to which their service satisfies these various interests. They say this can be accomplished by an engineer using common sense founded on traditional values such as bonesty, integrity and fair play.

Undermining this imperative is the absence of a formula for distinguishing good balances from bad ones.

The third rival to Cicero-style morality follows from new ideas about the basic nature of engineering. These ideas are lethal to Cicero's agenda. For this approach has a correct premise; Engineering is neither an applied science nor any other kind of science.

The writer is director of the Large Space Structures Institute at Howard University and chairman of the ethics committee of the American Association of Engineering Societies. He contributed this comment to The Washington Post.

Embarrasses Leaders. **Sets Rumors Swirling**

By James Brooke New York Times Service LAGOS — The killing of a Nigerian editor more than two months ago has become a major embarrassment for the government of President Ibrahim Babangida.

Lagos Editor's Death

Mourning a man most of them never met, thousands of Nigerians have flooded the office of Newswatch, Nigeria's largest news magazine, with letters mourning the death of Dele Giwa.

Mr. Giwa, the magazine's 39-year-old editor, was killed Oct. 19 by a powerful package bomb sent to his home. In a nation generally regarded to have black Africa's freest and most diverse press, the kill-ing has grown into a political liabil-

The incident has cast a shadow over Nigeria's generally clean hu-man rights image. "The government has got to get this monkey off their back," one diplomat said. It is generally agreed that Mr. Giwa's combative style of journalism, learned in eight years spent in New York, proved too peppery for someone in Nigeria. But with no suspects in jail and the police working in secrecy, Nigerians have become sleuths in a national whodun-

Some suspect Nigeria's military intelligence agency, the State Security Service. Two days before his ago, when a foreign-exchange death, Mr. Give was called in by shortage limited the imports of the intelligence agency for the fourth time in a year to answer questions about his coverage of a home-grown version, Newssensitive political topics.

Others point to Mr. Giwa's exposes of corrupt Nigerian businessmen and drug dealers who have turned Lagos into a transit point for heroin to the West.

And others, noting that this is the first parcel-bomb killing in memory in Lagos, look with suspicion on a group of Israeli security experts who train and advise Nigeria's presidential guard.

Although Mr. Giwa's killing remains unsolved, it is clear that Nigeria has suffered a trauma deep enough to cross the tribal and geographic divisions of the fractious nation of 100 million people.

"The entire country was stunned; we are getting thousands of letters from all over Nigeria," umbassador to the Soviet Union said Ray Ekpu, the new editor in chief, as he sat in the office he inherited from Mr. Giwa.

playwright who recently won the Nobel Prize in Literature, set up a national reward fund to try to find

On Nov. 8, the day of Mr. Giwa's funeral, all Nigerian newspapers came out with black mastheads. It was the first such tribute since 1976, when the president, General

Murtala Ramat Muhammed, was Nigeria's grief over Mr. Giwa's death seems spurred in part by the average man's identification with the editor. Mr. Giwa's father was a laundryman who paid his son's school fees by washing the clothes of teachers at Oduduwa College in Ife, about 140 miles (225 kilometers) northeast of Lagos, where the younger Mr. Giwa was editor of the

achool newspaper.
Mr. Giwa traveled to New York in 1971, supporting himself by working in a plastics factory and by driving taxis. In his free time, be earned a degree in English from Brooklyn College.

He later carned a master's degree public communications from Fordham University and worked as a news clerk for The New York

WHEN Serge Lifar was first introduced to the dancers in the Paris Opéra Ballet in 1929, their attitude toward the new Russian guest star from Diaghilev's recently disbanded Ballets Russes was decidedly hostile. Within a few hours of rehearsal, however, their future director already felt at home. Looking back later upon his relationship with the company, Lifar saw himself as "a sort of happy shepherd.'

Lifar's flock, in fact, remained unusually loyal during the nearly 30 years he reigned as head of the Paris Opera Ballet. A controversial figure whose self-advertising personality may have hindered a balanced appreciation of his achievements, Lifar has been easily scorned by British and American critics who - unlike the French - have not seen the majority of his ballets. In most cases, they did not see Lifar at his dancing peak,

His death in Lansanne on Dec. 15 at the age of 81 is a reminder again that Lifar's career - with all its contradictions - needs to be placed in perspective. Universally dubbed one of ballet's greatest egocentrics (even by his admirers), he has also been recognized (even by his detractors) as the major figure in the renewal of 20th-century French ballet. Yet, perhaps in the long run he will and should be remembered for ideas and actions that were forerunners of many premises we now take for granted in dance.

Born on April 2, 1905, in Kiev, the son of a civil servant, Lifar began studying ballet at the late age of 16. A friend took him to the private school of Bronislava Nijinska in the Ukranian capital. Nijinska rejected him, but he managed to get into the classes she taught in the state-run Central Studio of the Kiev Opera Ballet, which she then directed.

When Nijinska rejoined Diaghilev's company in 1921 and sent for five of her best male pupils from Kiev, Lifar substituted himself for one who dropped out. As a dancer and, later, budding choreographer in the Ballets Russes from 1923 until Diaghilev's death in 1929, he was clearly the impresario's favorite. Diaghilev sent him to study with Enrico Cecchetti in Turin to make up for his lack of classical training.

Despite his late start. Lifer had an unassailable stage presence. In a company that was totally experimental, he was perfect material. Nowhere was this more evident than in the young George Balanchine's ballets. Beginning with "Barabau" (1925), a comic ballet to a sung cantata in which Lifer was a police sergeant chasing an Italian peasant, he was cast in most of Balanchine's ballets. This historical fact was recalled by Balanchine many times in recent years whenever he was accused of not having created major roles for men during his career. The premieres of Lifar's choreography — the execution of "Apollo" and "The Prodigal Son," of course, his ideas — did not receive universal recognifeatured Lifar in the title role.

Lifar also danced in the numbers Balan-chine created for Charles B. Cochran's revue in London in 1930. A year earlier, however, Lifar had been invited to dance in the Paris Opéra Ballet's version of Beethoven's "The Creatures of Prometheus." Balanchine, the original choreographer, fell ill, and Lifar took over the choreography. In 1931, at the invitation of Jacques Rouche, the Opera's director, Lifar officially became ballet master and dancer. He was director until 1945, when charges of collaboration with the Germans—not helped by his own boasts of high connections with German authorities caused him to leave and become director of the Nouveau Ballet de Monte Carlo. Cleared but given a year's suspension, he returned as director of the Paris Opéra Ballet in 1947. The condition was that he not dance on stage, given postwar feelings. In 1949, he danced again, and his last performance at the Opera was as Albrecht in "Giseile" in 1956. He resigned as director in 1958.

No factual account can quite convey the passions Lifar engendered. These were rooted in his artistic ideas, not merely in his wellpublicized escapades nor on his penchant for creating roles for himself.

But it was his serious side that caused the deepest controversy. He held high the banner of neoclassicism in ballet and campaigned to make choreography an independent art. In the age of Balanchine, this is a familiar aesthetic. But it must be remembered that Lifar publicized this viewpoint in the 1930s. when it was far from accepted.

In retrospect, the ideas of Lifar, Nijinska and Balanchine are remarkably close. The academic idiom was a springboard for innovation. Dancing was to be the prime element in ballet. Early on, Lifar recognized Nijin-ska's insistence on the autonomy of ballet technique - that its formal values had their

Lifar publicly went further. Dance, as an independent art, could exist without music, he proclaimed in a manifesto in 1935, as much as 15 years before modern dancers, including Merce Cunningham, came to the same conclusion. Lifar realized these ideas in "Icare" (1935), his most famous ballet. He choreographed the work to no music — only a percussion score based on his rhythmic

Lifar also added what he called the sixth and seventh positions to ballet's five basic foot positions. In the sixth, the feet were parallel — Lifar often gave his ballerinas plies on toe in this position. In the seventh position, one foot was behind the other in single file. We saw it in the archaic profile with shoulder held forward in the Paris Opera Ballet's revival of "Les Mirages," seen in New York last year.

tion. In part this was because, unlike Balan-

Lifar in "Icare," staged for the Paris Opéra Ballet, 1935.

chine and Nijinska, he insisted on dancing and choreographed often to his own capabilities. More important, he had never acquired the full lexicon of classical training they had received in St. Petersburg. Whether he had the requisite genius is another issue.

Nonetheless, the seriousness of his endeayour should not be questioned. One has only to recall the decadent image of the Paris Opera Ballet when he took over. He battled with the concept of the Opera "as a drawing room" where people came to socialize, and he sought to make ballet more than trivial entertainment. His first order was that the house chandeliers be extinguished during performances. Male dancers were ordered to shave off mustaches, ballerinas forbidden to wear personal jewelry on stage. He ended the practice of using the infamous Foyer de la Danse as meeting ground between ballet girls and admirers. He inaugurated a full evening of ballet every Wednesday, along "hallet months."

By all accounts, he was charismatic as a

young dancer. His dark exotic looks and athletic body gave him an animal intensity. A child's-eye view is unreliable, but in 1949. on a trip to Paris, I saw his portly but stilldramatic presence dominate the stage in 'Icare." The image remains.

In 1985, I saw the Ballet de Naucy perform his "Phèdre," with its libretto and decor by Jean Coctean. Alternately broken-lined and academic, the choreography needed better dancers, but the ballet's conception was fas-cinating. Lifar's major neoclassical ballet different from his mostly allegorical works - is "Suite en Blanc," to be performed in May by the Opera's école de danse.

During the 1979 Bournouville Festival in Copenhagen, I found myself sitting next to Lifer and then met him again in 1982 at Gilberte Cournand's Galerie de la Danse in Paris. Somewhat bitter, he expressed concern that he would be forgotten. History, however, will make a place for Lifar as a serious contributor to 20th-century ballet — one who did things his way.

Ibsen's Grim Last Laugh

By Robert Cushman Dy Robert Cushman

Condon — More than any other lisen play, "Ghosts" tells its story through progressive revelation of the past: all very gripping the first time you see it and all very wearying thereafter. Nor are lb-sen's once-shocking ideas enough in themselves to hold us, though his defense of the questioning and indefense of the questioning and in-dependent spirit against the dead hand of received authority grows more pertinent daily. What we need is revelation of character. We

want to see people not just cleverly revealing their past but growing in

front of us in the present. In the production at Wynd-ham's, Vanessa Redgrave as Mrs. Alving mavels further than any ac-tress I have seen in the role. She shows us a woman who has all the intelligence and resourcefulness in the world, but still has to learn how to use them. Her education consists of shedding the illusions that the respectable world calls ideals. Love for her drunken husband died long before he did. Pastor Manders, the man she has always wanted, backs away from her. Her enlightened ideas themselves prove to be illusory. We leave her facing the last taboo as her son lies helpless in the grip of the syphilis that was his father's only real bequest to him.

She may or may not administe

Redgrave, in the last second goes through the motions of choice and they look equally agonizing. She never, it seems, acrs on auto matic pilot. The performance is freshly created as you watch. There can be rough edges, and at times she seems absurdly youthful and free-flowing for a 19th-century Norwegian chatelaine. But the essence of this Mrs. Alving is the discovery of freedom hence the potency of her scenes with Tom Wilkinson's pastor, who retreats terrified into his shell as she emerges from hers. He is a robust man who chooses to be weak: a fool who ends up gratefully embracing his

The current between these two is so electric that one rather resents the intrusion of the other characters: an Oswald who shouts all the time and a Jacob Engstrand, the crooked carpenter, who suffers from terminal good taste, spurning all the cary laughs that Ibsen, who knew the value of a comic villain, has so generously offered him. An excessive virtue also afflicts the set: all bare walls and no atmosphere. elemental or domestic.

In one respect Ibsen has had a grim last laugh. We can no longer dismiss as dated a play that enlists venereal disease as an agent of destruction. No AIDS play could pre-

book. Some of them here tast back-into the smugly exaggerated imita-tion-Yankery that I thought had died out years ago, but others are excellent: Neil Daglish as the young Miller-figure, Barry James funny as an aspiring songwiter ("Just left me write one hit, mondevestating clarity.

The National Theatre's two biggest successes of last year were American family pieces, both auto-hiographical, both set in the De-pression: Neil Simon's "Brighton Beath Memoirs," now transferred to the Aldwych, and Arthur Miler's "The American Clock." promoted from the Cottesloe to the Olivier, where it has acquired sever-THE LONDON STAGE

extra actors and a revolving

stage, all of which fill out Peter Wood's production very nicely. Miller's play is now billed as a vandeville, acknowledging the im-portance of period songs to the show's appeal. But though the staging works as well as ever, the play does not. The split focus is far more damaging on a bigger stage. The play brings in too many extraneous characters to be a tight family drama, too few to

be a commehensive American spic. Miller acknowledges a debt to Studs Terkel's book "Hard Times": I wondered what the company might have achieved if they had

Arafat Denounces West Bank Aid Plan

New York Times Service

BAGHDAD - Yesser Arafat has denounced a Jordanian program (or Palestinians in Israeli-occamied territories, declaring that the United States and Israel would use the plan to impose "a de facto normalization of relations" be-

tween Jordan and Israel. Mr. Arafat, chairman of the Palestine Liberation Organization, also cautioned the Arab countries against supporting the plan, contending that it would mean "an acceptance of the continuation of the Israeli occupation for at least

five years or even longer." "We are against the so-called development program which is currently being implemented in the occupied territories because we cannot possibly believe that our enemy is really concerned about the development of our land" while it is under Israeli occupation, Mr. more money from them. Arafat said in an interview here Saturday.

Jordanian officials have portrayed their \$1.4 billion program as the only way to prevent an israeli-forced exodus of Palestinians from the occupied West Bank to Jordan.

The five-year development plan, which would focus primarily on housing for the Palestinians, has been viewed as a way for Jordan to reassert its legal responsibility for the West Bank, which Israel has occupied since 1967, by providing an alternative source of aid.

Explosion in Prague A powerful explosion rocked the State Planning Commission build-

ing in Prague on Tuesday, and witnesses said at least one person died in the blast. The Associated Press

Pragne's evening newspaper Ve-cerni Praba said that five people were injured and that one person was still missing several hours after the 7 A.M. explosion.

The paper said the blast apparentily was caused by an explosion of leaking gas.

Chile, Paraguay, Cuba Assailed for Repressing Media

WASHINGTON -A survey of journalism in the Western Hemi-sphere lists Chile, Cuba and Paragnay as among the worst offenders against freedom of the press.

The annual survey by the Comcil on Hemispheric Affairs and The Newspaper Guild, released Mon-day, described the three countries as "dismal islands of repression." where journalists face "suppression, intimidation, beatings, arbitrary arrests, torture and outright

In addition, the report said that other, more subtle forms of control are common in the hemisph "including economic reprisals and incentives." In most Latin American countries, the report said, governments exercise considerable control over newsprint distribution and broadcasting equipment, and reporters in some countries - including Mexico - routinely take bribes to supplement their inadequate salaries.

While urging condemnation of the Sadinist government in Nicaragua for its suspension of the newspaper La Prensa, the report noted there may have been justification for the closure, since "fresh reports now show that La Preosa received funding from the U.S. govern-

Center has notified governments of at least seven nations, including West Germany, of suspected crimi-

nals living within their boundaries. He said the files disclosed 17 living in Britain, 50 in Australia, 26 in Canada, 13 in Sweden, 3 in Venezuela and 1, a Treblinka death camp guard, living in Brazil. Rabbi Hier said his staff would not disclose the names publicly.

A spokesman for the West German Justice Ministry, Jürgen Schmid, confirmed receipt of the list and said Chancellor Helmut Kohl's office had also received a

"We are already checking it," he said. "After our check has been completed we will send the names to the appropriate prosecutors' of-fices for further investigation."

He said the names on the list also would be furnished to the Nazi Documentation Center in Ludwigsburg for additional screening.

"It can be that some of the

names on the list are already known here" or that some already had come up in legal cases, he said None of the names will be made public in West Germany unless prosecutors determine there is sufficient evidence to file charges or unless suspects have been charged previously, Mr. Schmid said.

Behind the Strife: Chirac Trying to Change a System

tional Herald Tribun

PARIS -At the heart of France's worsening strike of public workers is a question that extends far beyond the state-owned SNCF railroad system and holding the line on wages: Is it possible to change and eventually reduce long-established privileges, work-ing habits and benefits of five million state

No previous French government has launched a major effort to address that issue. But for the conservative government of Prime Minister Jacques Chirac, reducing the costs in the state-controlled sector, which represents about 30 percent of France's gross national product, and making it more effi-

cient, is crucial for stimulating the economy. That explains why the government remains determined to implement a pay scale based on merit, rather than on seniority, at the SNCF and possibly in other statetrolled enterprises. The original plan for the railway was suspended last week, but union leaders are convinced it will reappear soon in

The railroad program, aides to Mr. Chirac and government officials emphasized, was only a first step in providing the SNCF greater flexibility in managing its 230,000 employees and, above all, reducing costs. The railroad has not earned a profit since 1969, but last year it reduced its loss to an estimated 3.4 billion francs (\$532 million) from 4.4 billion francs in 1985. Before the

strike began, the railroad had hoped to be in However, most employees of the SNCF and other state-owned enterprises, such as the postal and telecommunications author-

systems unchanged. Backed by national unious, they are challinging what has been called "the Chirac prises.

NEWS ANALYSIS revolution," which is based on reducing the

role of the state in the economy and restoring mpanies to profitability. At the Gare du Nord in Paris, where the strike began Dec. 18, a striking railroad engi-

neer said: "We have built up a system of privileges and benefits, and we are determined to keep it that way, whatever Mr. Chirac or the SNCF management wants."

The scope of the problem was first outlined several years ago by a best-selling book, "Toujours Plus," or "Always More," which has sold about one million copies and is still The author, François de Closets, a televi-

sion commentator on economic affairs, said that what had been accumulated by workers at the SNCF, the Paris Métro, the electricity and gas utilities and in other state-controller enterprises was extraordinarily costly to taxpayers. He said that the phe ing deliberately hidden from most of the French public.

Workers in most of those sectors were either still striking Tuesday or planned work stoppages in the next several days. Their spokesmen said they were primarily protesting the government's determination to hold down overall wage increases to around 3 percent this year.

But they quickly added they were equally

Transfer Programs Help Spouses Find New Jobs, Too

By NANCY YOSHIHARA

Las Angeles Times Service

WEDNESDAY, JANUARY 7, 1987

OS ANGELES — When an employee of a major bank in Chicago was asked to transfer to Los Angeles, her husband supported the move and decided to leave his job as a policeman to accompany her. But his search for an appropriate new career turned out to be one of the worst experiences of his life.

Finally, his frustration led him to attempt suicide. Fortunately, there was help - in the form of the bank's

spousal assistance program for relocated employees. We worked with him for three months," recalled Pearl M. Tabbert, a career-manage-ment consultant whose Chica-go company, Pearl M. Tabbert & Associates, came to the hus-

There are more dual-career families, and they likely will increase dramatically. band's rescue. "Within six weeks, he connected with a

job. He found a job he really liked, is in control of his life." While employee relocations seldom reach such a crisis point, helping a spouse find a new job is increasingly becoming a concern for major companies that frequently transfer workers. And programs designed to assist transferred spouses — male or female — with resumes, interviews and employment tips are getting more attention as part of relocation benefit packages.

There are more and more dual-income and dual-career families, and we are likely to see that increase dramatically in the future," said Anita Brienza of the Washington-based Employee Relocation Council, a group representing 10,000 corporate and independent relocation companies.

"There are more and more families where they work out some type of arrangement as to who is going to make the move," said James E. Challenger, president of Challenger, Gray & Christmas Inc. of Chicago. "It really is becoming a mutual decision whose careers should be governing, depending on who is easier to move."

Moreover, the second paycheck now accounts for a greater percentage — 40 or even 50 percent — of the family income. In an annual study, Runzheimer International, a Rochester, Wisconsin-based relocation specialist, surveyed 150 of the Fortune 500 companies and found that 44 percent offered job servers and found that 45 percent offered job servers and payches and found that 45 percent offered job servers with the companies and found that 45 percent offered job servers with the companies and found that 45 percent offered job servers with the companies and found that 45 percent offered job servers with the companies and found that 45 percent offered job servers with the companies and found that 45 percent offered job servers with the family income.

or career-counseling programs for spouses. That compared with

However, only 15 percent of those offering some sponsal assistance had a formal program that appeared in their employment-policy manuals and was offered to all employees. The remaining 85 percent had more informal programs.

OT SURPRISINGLY, the survey showed that the more transfers there were within a corporation, the more likely the company was to have a formal assistance program. Similarly, smaller companies were less inclined to provide assistance than larger ones.

Companies, typically, will not volunteer information about spousal assistance programs. Dick Hamlin, of the Los Angeles consulting company of Thomas-Mangum Co., said that a company ny's willingness to assist a transferee's spouse depends on "one, how much a company wants the individual and two, how good a

negotiator the new hire or transferee is." Corporations are taking the low-profile approach to assistance programs because of the expense, with formal third-party sponse issistance programs costing from \$1,500 to \$5,000 an employee. But, the Runzheimer survey showed, the average cost for assisting ouse in informal company programs was less than \$100

In the end, relocating can be costly for the transferee, too. The move is not necessarily perceived as a move up the promotion ladder, and giving up that second income is not easy.

Rumors **Grow of** Hill Bid

Unknown Buyer **Boosts Shares**

By Warren Gerler

LONDON - Speculation intensified Tuesday that a foreign company, possibly based in Australia or New Zealand, is accumulating shares in Hill Samuel Group PLC, a British merchant banking group, in what might signal a takeover bid.

Hill Samuel's share price has risen more than 60 pence from around 360 pence before Christmas.

The shares closed Tuesday at 426 pence, up 16 pence from Monday. Dolf Mootham, Hill Samuel's group finance director, said there had been buying on Monday and

"We don't know who has been buying," he said.

Mr. Mootham said that New Zealand Insurance Co., New Zea-land's largest insurer, had acquired under 3 percent of Hill Samuel's shares in recent months and ap-pears on its register of sharehold-

But, he said, there was no way of knowing whether NZI was behind this week's buying.

"Nobody has said they've acquired over 5 percent," of Hill Samuel outstanding shares, he said. Under British corporate law, a shareholding of 5 percent or more must be disclosed within three

At current market prices, a full takeover of Hill Samuel would cost an £392 million (\$577.6 million).

Although the buyer's identity is unknown, analysts said that Ord Minnet, a large Australian stockbrokerage that is 50-percent con-trolled by an Australian banking conglomerate, Westpac Banking Corp., appeared to be placing or-ders to acquire Hill Samuel shares on the London Stock Exchange.

Both Ord Minnet and Westpac representatives in London declined to comment. Speculation has pointed to Westpac as a potential buyer because the bank is known to seek diversification abroad.

Russell Middleton, managing di-rector, in the London office of McCaughan, Dyson & Co., an Austrolled by Australia-New Zealand Group, said: "If it were Westpac, I don't think Westpac would use its own broker to do the buying."

Little Minnetonka Shakes the Giants

Consumer-Products Firm Develops Third Success

By Steven Greenhouse New York Times Service

CHASKA, Minnesota . Minnetonka Corp. doesn't look like much: Its headquarters are in an anonymous one-story cin-derblock building across from some comfields. But in the consumer-products industry, the company has churned out revolutionary new products that have thrown industry giants on the defensive.

Minnetonka, based just west of Minneapolis in Chaska (population 8,643), first made its mark in 1979, when it introduced Softscap, the first mass-market liquid soap - and established a new product concept that joked the lackhister consumer-products industry.

Then came Minnetonka's Check-Up, the first anti-plaque toothpaste and the first in a pump dispenser. Now with ris-que advertisements and a marketing blitz, its Obsession scent is fast becoming the second most popular fragrance in America, behind Giorgio.

The company reached \$100 million in sales in 1985, and Robert R. Taylor, its chairman and founder, said they should surpass \$200 million in 1986 and \$500 million within five years.

passion - 10 20 out on a limb

Minnetonka's success, he said, lies in a willingness - almost a

with an unusual, often untested

"Many large consumer-prodnots companies get caught up in structure, research and justifica-tion," he said, "They're always trying to do a thorough job of

"When they get all the facts together, though, they find they can't do away with all risks and they often end up either doing nothing or moving very slowly."

Still, Minnetonka's chief prob-

lem has been that whenever one of its innovations catches on, the big consumer-products compa-nies move to develop a similar product and grab a share of the

So Mr. Taylor, a 51-year-old native of Baltimore, works hard to stay one step ahead. He is hoping to capture 50 percent of the children's bubble bath market with a new Sesame Street bubble bath. (When someone suggested test-marketing it, he said: "Every kid knows what Sesame Street is.")

Mr. Taylor is optimistic about other new offerings, too: an antiplaque bubble gum, a wart remover and a treatment for thin-

ideas, some analysts warn that Minnetonks's growth may not be as quick as Mr. Taylor hopes. For introducing a breakthrough

product is only the start, as the Check-Up toothpaste experience proved: When Minnetonka's toothpaste caught on, giant consumer-products companies trampled little Minnetonka's innovation with similar products of their own.

Some analysts also question how well an entrepreneur like Mr. Taylor will do as nuts-andbolts manager of an expanded

Mr. Taylor, a Stanford MBA, left his job as a Johnson & John son sales manager in 1964 to start the company, hiring dezens of women to handroll soap in his garage. His initial investment was \$3,000.

Until he got the idea for liquid soap in a pump bottle, Minne-tonka was an offbeat company geared to hippies and people with huxury bathrooms, Early products included a yellow lemon-shaped soap, a green appleshaped soap, cocoe-butter soap wrapped in brown paper to look like a Hershey bar, along with sachets, fruit-scented shampoos and waxless candles.

His first real breakthrough came one day when he was driving to work. "I thought how ugly. bar scap is, and how it usually messes up the bathroom." Mr Taylor recalled. "I thought, Why not a high-quality liquid See MINNETONKA, Page 9

BankAmerica Snubs Merger, Vows to Fight

of BankAmerica Corp. have unanimously rejected a merger proposal 1986. from First Interstate Bancorp with a stated value of \$3.2 billion and vowed to light for independence.

BankAmerica officials did not say how they would light the proposal from First Interstate.

"We're going to come out fighting with everything we have." said A.W. Clausen, BankAmerica's chairman and chief executive offi-

The company, parent of troubled Bank of America, the second-larg-est U.S. bank, also said late Monday that it would soon file a registration statement for raising additional capital by issuing new stock. It did not say how much it hoped to raise or how it would market the shares.

First Interstate, in a statement later, said it would "continue to study the situation and review its options." Its name had been linked with that of BankAmerica since

last March, well before it launched its initial bid in October. First Interstate, based in Los Angeles, has indicated that, pending regulatory approval, it plans to go ahead with its bid of \$21 in securities for each BankAmerica com-

mon share.

BankAmerica's rejection had been expected. The board previously asked First Interstate to with-

Mr. Clausen called the First Interstate proposal "wholly inadequate, highly conditional, of questionable marketability and clearly not in the best interests" of share-

holders or customers. He and other other bank officials said the bank's financial adviser, Salomon Brothers, had found the offer to be financially inadequate. Also, BankAmerica officials said, the offer is worth less than \$21 a share because the combination of securities being offered by First In-

terstate is of questionable value.
"If shareholders could get \$17 in cash for them, I think they'd be lucky," said Frank N. Newman, BankAmerica's chief financial offi-cer. "Those securities are a joke." As for raising capital, BankA-

merica has been reluctant to initiate a common-stock offering because the price of its stock is would further dilute the value. Mr. Clausen said that it was too soon to talk about specifics.

He said that BankAmerica would return to operating profitability in 1987, meaning that the bank would be profitable even without nourecurring gains from

But he said it was unlikely that the bank this year would restore its common stock dividend, which it

Mexico Begins Futures Market On Peso Rate

United Press Inter-MEXICO CTTY - Mexico's central bank has begun a futures market on the peso-dollar exchange rate, allowing busi-nesses to bedge against currency fluctuations.

The market allows businesses to buy six-month certificates for so-called controlled dollars at the peso price of the day, locking in what is expected to be a stronger rate than the peso would have in six months. It is understood that a secondary market will be developed.

Central bank sources said the market moved moderately in the first day of trading Monday but had no figures on the number of certificates purchased. The controlled dollar is used

in Mexican international commercial transactions and its rate is set daily by the Bank of Mexico. There is also a free-market rate, but the controlled market ecounts for 75 percent of dollar transactions in Mexico.

Dollars in the controlled market increased against the peso by almost 150 percent during 1986, going from 372 pesos to the dollar on Dec. 30, 1985, to 925 on Dec. 30, 1986. On Monday, the rate was also pegged at 925. Financial analysts have attributed the increase in large part to Mexico's inflation rate, which the government estimates will be as high as 105 percent for 1986.

SAN FRANCISCO — Directors its huge losses — about \$600 million for the first nine months of

BankAmerica officials did not [Analysts agree that any bostile takeover battle will be fierce, saying that BankAmerica is probably ready to fight back, Reuters report-

ed from Los Angeles. [Analysts were unsure whether First Interstate would respond immediately.

[While some argued that immediate action, pending regulators approval, might prove damaging, others said that First Interstate could not afford to wait much longer before making a hostile hid.]

Guinness Warns Firm to Return £7.6 Million

LONDON - Guinness PLC has asked for the return of £7.6 million (\$11.1 million at current exchange rates) that it said has been held by the merchant banking firm Henry Ansbacher & Sons Ltd. since May and will sue if the money is not repaid by Jan. 20, Guinness' lawyer, Sir David Napley, said Tues-

Guinness said the money had been deposited at Anshacher at the successful end of its £2.7 billion bid for Distillers Co. Ansbacher has said the money was used to buy 2.15 million Guinness shares during the takeover battle with Argyll Group PLC.

Asked if the bank would return the money to Guinness, a spokesman for Ansbacher re-plied: "No." He said that when the funds were received they were used immediately to buy the Guinness shares.

Tuesday evening a company spokesman said some directors had ended a meeting, though to have been with Guinness chairman Ernest Saunders.

Mr. Saunders has been under pressure to resign since the government began investigating Guinness shareholding transac-tions during the Distillers bid.

Semiconductor Industry Failing, U.S. Reports

By Andrew Pollack

New York Times Service SAN FRANCISCO — America's semiconductor manufacturers, the linchpin of the nation's electronics industry, are rapidly falling behind their Japanese competitors, according 1,8157 * to a variety of experts and government docu-

ments assessing the situation.

And while many experts have wondered whether the industry could maintain its technological lead over Japan, the question now being asked is whether the U.S. makers of semiconductors - the tiny silicon chips that are the S. Kor., word 869-25 Seviet rotale 8.4439 Speed, krosto 8.447 Torisons 9.551 Theil both 9.559 Torisian tro UAE dirhom Vanco, beliv. 23,90 heart of computers and other electronic devices - will survive at all, or in what form.

An assessment by the Central Intellig Agency concluded that "we believe the U.S. semiconductor industry is at a crucial turning point in its history. It fundamentally cannot compete in its present form."

Moreover, experts say, the decline poses a serious commercial problem, both because semiconductors are an important industry in their own right and because they are the key to many even larger industries that use the chips. A report by a panel of the Defense Science Board, a scientific adviser to the Pentagon, is expected to recommend that the Defense De-partment spend almost \$2 billion over five years. A draft summary of the report and minutes of one of the panel's meetings were provided by sources who asked to remain unidenti-

fied. The report is to be released this month or

It concindes that the Japanese now have a technological lead in most silicon products, with the exception of customized logic chips and microprocessors. But even in those areas, the U.S. lead is narrowing. Japan also leads in non-silicon products, such as opto-electronic circuits that process light as well as electricity.

In the materials and equipment used to make chips, the United States and Japan are at par, with the Japanese gaining. The report shows that, of 25 semiconductor products or process-es, Japan leads in 12 while the United States leads in five, with parity in eight. The chart also shows that the U.S. position relative to Japan is declining in 19 of the 25 categories, including four of the five in which the United States now leads. In six categories the United States is maintaining its position; in no case is it gaining.

The general decline could weaken the entire U.S. electronics industry so that it would no longer be in a position to advance rapidly, but the Defense Science Board's concern is most immediately related to national security.

Even though Japan is an ally, it might not want to sell the latest technology to the United States. This could be because the Japanese do not want to show their best technology to companies that also compete with them in nonmilitary areas. During the Vietnam War, for ace, some allies refused to sell equipment

examples of foreign dependency, and the con-cerns attached to such dependency, include the The National Security Agency, which is

charged with electronic eavesdropping and communications security, buys ceramic packages for 171 of 195 customized chips from one Japanese company, Kyocera Corp., which dominates the market. At one point, Kyocera, without warning, discontinued making the co-ramic package for one key component. · Japanese semiconductor companies that also make supercomputers are not supplying

their best chips to U.S. supercomputer companies, according to Norman Kreisman, an Energy Department official involved with supercomputers. The machines, the fastest computers in existence, are used for weapons design and code-breaking, as well as for weather forecasting and other civilian applications. Lloyd Thorndyke, the president of ETA Systems, a supercomputer manufacturer, said that, since supercomputers depended on using the most advanced components, it was quite likely that the most advanced supercomputers would eventually come from Japan unless the govern-ment helped the U.S. chip industry.

• Of 3,000 unique chips needed for the U.S. instance, some allies refused to sell equipment to the United States.

According to the minutes of the Defense Science Board meeting, held last February, the James J. Egan, an official with Aerospace Corp.

Indonesia Budget For '87-'88 Calls For Austerity

Compiled by Our Staff From Dispatches JAKARTA - President Suharto of Indonesia presented a draft 1987-88 budget on Tues-day calling for austerity mea-sures but projecting that a sharp decline in earnings from oil would be partly offset by a rise in other revenues and forcign aid.

"Due to the extremely limited state finances, austerity measures will be increasingly tightened," Mr. Suharto said in an address to the House of Repre-He said the budget set a tar-

get of 22.783 trillion rupish for government expenditures in fis-cal 1987-88. Although this is a September triggered by the fall in oil prices. (Reuters, UPI)

NYSE Again Rises to Record

NEW YORK — Prices on the New York Stock Exchange continued to rise Tuesday,

stock Exchange commund to her luesday, pushing the Dow Jones industrial average to its second record finish in two days.

The Dow, which soared 44.01 points Monday for its biggest daily point gain, edged up another 3.51 points Tuesday to 1,974.83.

Trading was heavy, but some of the institutional buying that has powered the Dow's gain sputtered. Profit-taking also kept Tuesday's

gams modest.

Gainers led losers 9 to 7 among NYSE issues traded. Volume rose to 189.3 million shares from 181.85 million on Monday.

The New York Stock Exchange composite index rose 0.42 to 144.81. The price of anaverage share added 11 cents.

A strong bond market and the absence of tax-related selling pressures, which fueled a 75-point gain for the market Friday and Monday, were also factors Tuesday, analysts said. But at

mid-day Tuesday, profit-taking in the bond market encouraged a similar move in stocks. The market got a little tired on a short-term basis in the middle of the session, said Gerald Simmons, managing director in the listed trad-ing department at Smith Barney, Harris Upham. "Some of the buying power has spent

He said that scattered profit-taking was nor-mal after a dramatic two-day gain. He said does not a buil market make," he said.

3.00 22 1.00 1.1

today," another analyst said. "There was no news around and nothing to sustain the market in terms of fundamentals. This movement upward was based mostly in internal dynamics of the market." He said some of the faltering in the bond market and weakness in the dollar conributed to a slowing in the market's momentum today as some investors recalled interest rate

"This two-day run, the most tremendous move in market history, can't be sustained for-ever," the analyst said. "The market can't fight the rules of gravity,"

The market had climbed sharply Friday in fairly light trading, but the advances Monday

Tuesday came on heavy volume. James Andrews, head of the institutional trading desk at Janney Montgomery Scott in Philadelphia, called the Dow's 75-point gain so far this year "very, very positive for the general market."

He said the industrial average 2,200 by mid-February. A favorable prognosis for President Ronald cagan's health encouraged investors, analysts

said. But they said a more concrete factor is tha money managers are back in the market with money to spend. Navistar was the most active NYSE-listed issue, unchanged at 54. Baxter Travenol followed, rising ½ to 20%.

Commonwealth Edison was third, rising % to (UPI, Reuters)

Distillers Corp. To Sell Almaden

NEW YORK - National Distillers & Chemical Corp. said Tuesday it had agreed in principle to sell the brands and assets of Almaden Vineyards to Heublein Inc., a subsidiary of RJR Nabisco Inc. The price was not disclosed, but an industry source, who declined to be identified, said that it was "well in excess of \$100 million."

National Distillers announced in September its plan to sell all of its spirits and wine operations to focus on core businesses, such as chemicals

Almaden, based in San Jose, California, produces and markets Almaden brand table wines, champagnes and brandies, as well as premium wines under the Charles Lefranc Cellars label.

MINNETONKA: Small Firm Shakes Giant Consumer-Products Industry

(Continued from first finance page) \$50.7 million in 1983. Minnetonka soap that comes in an attractive lost money in both 1982 and 1983.

Taylor lives - ran an \$8 million predicting the company's demise. advertising campaign to introduce Softsoap. It was a big gamble: At the time, the company's net worth was only \$8 million, and its annual

sales \$25 million. The risk paid off. From 1979 to 1981, Minnetonka's revenues rose to \$96 million from \$25 million and its stock price soured to \$18.25 from \$1.25. Heady Minnetonka officials forecast that liquid soap would become a \$400 million market, and that Minnetonka would capture \$200 million of that. They

were wrong on both scores.

Close to 100 competitors jumped into the liquid-soap market and Minnetonka's market share plunged to under 30 percent. The stock fell back to \$1.875, and company sales declined 47 percent, to

And because Minnetonka was After developing a formula for fighting such giants as Procter & liquid soap, Minnetonka — named Gamble Co. and American Home after the nearby town where Mr. Products Corp., some analysts were

To stay affoat, Mr. Taylor cut his work force to 315 employees, from 550. He also reduced the Softsoap bottle to 7.5 ounces (212 grams) from 9 so that it could sell at a lower price, and introduced a bottle with new colors and floral de-

Minnetonka's smaller, redesigned Softsoap recaptured the No. 1 spot, with 38 percent of the \$120 million market.

Minnetonka's second breakthrough product, Check-Up toothpaste, had some of the same problems. Mr. Taylor said the company fared poorly because its toothpaste was not unique and because, unlike liquid scap, it was not a niche category, but a huge one that estab-

Japan Builders Accused Of Collusion in U.S. Bids

New York Times Service

New York Times Service

WASHINGTON — Japanese companies "may be colluding on construction bids in the United States," leading to a "serious restraint of competition," Senator Frank H. Murkowski, Republican of Alaska, said Monday, citing a letter from a Commerce Department official.

The letter, written last October by the Commerce under secretary, S. Bruce Smart Jr., to Douglas H. Ginsburg, then assistant attorney general for antitrust, said that the Commerce Department had provided "episodic evidence" of such activities by Japanese companies bidding on projects for the Bureau of Land Reclamation, a part of the Interior Department.

"If these allegations are accurate this system of matual consultation could seriously injure competition in the United States," added the letter, which was disclosed by Senate aides.

In an interview Monday, Mr. Smart said the Commerce Department had evidence "some years ago that Japanese companies might have colluded on contracts" for the Bureau of Land Reclamation. "We have no evidence that this has happened in the recent past," added Mr. Smart, who reasserted that the practice "could have an anticompetitive effect."

In his letter to Mr. Ginsburg, now an appeals court judge in the District of Columbia, Mr. Smart said the practice led to the rotation of winning bids among participants in the system.

Kansas Railroad Offers To Buy Southern Pacific

The Associated Press
KANSAS CITY, Missouri — Kansas City Southern Industries Inc. has offered to pur-chase the Southern Pacific Railroad and asked the U.S. Interstate Commerce Commission to

chase the Southern Pacific Railroad and asked the U.S. Interstate Commerce Commission to block the proposed merger of the Southern Pacific and Santa Fe railroads.

The Kansas City corporation, whose holdings include the Kansas City Southern Railway, did not say how much it would pay for the Southern Pacific, whose value was placed at about \$1.4 billion by Glenn Cameron, an analyst with Moseley, Hallgarten, Estabrook & Weeden Inc. in New York.

The KCSI offer Monday could be a ploy to get an agreement to allow Kansas City Southern to use track owned by Southern Pacific's parent firm, said Herb Buchbinder at Kidder, Peabody & Co. Inc. in Kansas City. Al Mauro, a Kansas City Southern spokesman, said of that analysis:

"We have no response beyond our filing."

A combination of the two railroads would create a system of more than 15,000 miles — including Kansas City Southern's tracks, which run south from Kansas City to the Gulf Coast, and Southern Pacific's line from Kansas City to California.

California.
A. Dennis Watson, an ICC spokesman, said the agency had not decided how it would respond to the KCSI request.

May Be Set for Jan. 19 PARIS — A public share flota-tion of Cie, Financière de Paribas, the second of 65 state-owned com-panies the government plans to sell to the public, will probably take place on Jan. 19, bank officials said Tuesday.

Investment certificates in the in-ternational financial services company were suspended on the Paris, bourse Monday ahead of the flots. The group's capital of 2.33 billion francs (\$366.22 million) is made up of 5.83 million investment certificates, a type of nonvoting stock, and 17,49 million shares, all of 100-franc nominal value.

Software Firm Sues 6, Charges Theft of Secrets

LOS ANGELES — Ashton-Tate Inc., a computer software concern, said it has sued its former chief scientist and five others for alleged theft of secret technology.

The suit, filed Friday in California state superior court, contends the company's former chief scientist, Wayne Rateliff, and the five others took proprietary information from Ashton-Tate to use at their own companies. The suit alleges that Mr. Rateliff threatened in 1985 to leave the company and take his research to a competitor unless Ashton-Tate "submitted to extortionate demands to pay him millions of dollars in royalties and other benefits."

Ashton-Tate's highly successful dBase family of database management programs was pioneered by Mr. Rateliff. The dBase programs, which are used by businesses to handle record-keeping tasks and to analyze lists, account for more than half of Ashton-Tate's revenues.

Mr. Rateliff left Ashton-Tate in January 1986 and operates his own company, Rateliff Software Production in La Crescenta, California. He is a consultant to Migent Corp., a software concern in Incline Village, Nevada. Migent's chairman, Carl Gritzmaker, who worked for Ashton-Tate until April 1985, also is named in the suit.

eternity, the essential, and life with its . baffling misunderstandings due to our mability

MISHIMA: A Vision of the Void By Marguerite Yourcenar. Translated from the French by Alberto Manguel in collaboration with the author. 152 pages. \$14.95. Farrar, Straus and Giroux, 19 Union Square West, New York, N. Y. 10003.

Reviewed by Bob Halliday

Tou the life and work of Yukio Mishima projects its author's personality and art as strongly as it does those of its subject. Your-cenar is sensitive to Mishima's fanatical fixation on what he perceived as the emasculation of Japan in recent times, his attempts in his own life to adhere to the heroic virtues of earlier times, and the visionary quality with which these obsessions were expressed in his writing. The ritual suicide that brough Mishima to the attention of a public that knew little of his books appears to Yourcenar the inevitable culmination of both his literary career and of the personal life he so consciously sculpted and shaped.

Yourcenar stresses the importance of autobiographical elements in Mishima's work. Thus, before starting on the extended discussion of Mishima's principal works that makes up the central portion of the book, Yourcenar reviews the traumatic adolescence which the writer himself transformed into the tormented memour-novel, "Confessions of a Mask." The erotic intoxication he felt upon first seeing a reproduction of Guido Rem's painting of the martyred St. Sebastian recurs in innumerable metamorphoses throughout his life.

The last portion of the book is the most suggestive. At the center of this meditation on the final phase of Mishima's life is a detailed comparison of, as it were, two Mishima suicides. The first was the one he commits in the film, "Patriotism," which he adapted from one of his short stories, directed and starred in. The action takes place in the home of a lieutenant in 1936. Although his co-rebels have been con-demand to immediate execution, the lieutenant has been spared because of his recent marriage He cannot accept this special treatment, and with the assistance of his wife commits seppuku. After he is dead, his wife takes her own life. The artistic neatness of this scenario is in-

LONDON — Dagenham, just east of the London docks, is the

place Henry Ford chose for his

U.K. production line. It is also

where old grandfather Allen be-gan a remarkable soccer dynasty.

Ernie Allen, the old rooster

himself, is dead now, but he

would not be surprised that Clive,

the eldest of his three grandsons in the English First Division, is

outscoring everyone in the land.
He would have expected young
Clive to prosper at Tottenham
Hotspur, where Clive's father,
Les, helped win a league and FA
Cup double 1961.

Érnie Allen doubtless would

also expect Clive's younger brother Bradley, just 14, to start the

New Year as the most sought af-

ter schoolboy player in southern

England.
One by one they roll off the

production line, but by any stan-dards Clive Allen's tale is excep-

He is, by common consent

among players I have spoken to, the most single-minded goal-scor-

er around, lately even more po-

tent than Liverpool's Ian Rush,

for whom Juventus has agreed to a transfer fee of £3.2 million

(\$4.75 million). Single-minded is a soft option

on the word selfish. Allen sees the

whites of the goalposts, shoots on sight and scores, he says, by in-

We tell him he's lazy and self-

ish," admits Tottenham's manager, David Pleat. "Clive is unique

in the English game. He's short of

speed compared to Ian Rush; he doesn't have the ability to out-

clean contact and talent for bring-ing teammates into the game like Nigel Clough of Nottingham For-

sense that makes him the coolest

finisher I have worked with. With

his eyes on the ball, he knows

where the keeper is. He can look one way and shoot the other. We

go along with Clive's deficiencies.

We adjust because, simply, he's

the best at doing what he's paid to

Such tolerance is self-imposed.

Australia IV in Defender Finals; Kookaburra's Protest Is Denied

FREMANTLE, Australia instralia IV's place in the Ameria's Cop defender finals was asired carly Wednesday after a proest by race loser Kookaburra II
ras rejected after nearly seven jours of deliberation.

The ruling by an international achting jury confirmed a 24-sec-and win by Australia IV that put he boat into the best-of-nine-race lefender finals. The winner of the ielender final will race New Zeaand or Stars and Stripes who have pushified for the best-of-seven race hallenger final

The jury decision to throw out a
Kookabura protest over the use of m unusual balloon-like headsail by 'Anstralia IV ended chances of an

The Party of

the in the sentence of

22

Francis Committee

AMERICA'S CUP

final starting next week. But Kevin '87 syndicate that fielded the Kookaburra boats, could still decide to withdraw Kookaburra III burra II if he considers the older boat the faster.

After trailing for five legs, Bea-shel overcame a 2:17 deficit by playing the wind shifts with a sail that is a cross between a genoa and a spinnaker. Its use sparked an im-mediate protest by Kookaburra II.

Kookaburra II upped a 55-second lead on the first beat to 1:33 at the second mark. At the wing mark, down by a hefty 2:17, Beashel al-Kookaburra final.

Anstralia IV is expected to meet

Kookaburra III in the defender's spinnaker rigged as a genniker—

only about two feet from the deck, and with the foot of the sail sweeping below deck level - Australia Parry, the head of the the Taskforce IV picked up 10 seconds on the

A huge shift on the fifth leg found Australia IV on the upwind from the series in favour of Kooka- side of Kookaburra II as the two boats gibed to the buoy. The shift was so great that Australia IV was able-to slice 1:22 off the lead. Beashel took the lead at the sixth

mark by 10 seconds as Australia IV picked up another 55 seconds on an 85-degree wind shift. Australia IV cut the margin by another five seconds on the final

Gilmour started a desperate tacking duel on the final leg, but

Clive Allen, left, heading in his 21st goal of the year in a match against Nottingham Forest.

Bonham Road Produces Another Winner

Tottenham deploys the 4-5-1 formation used by teams at the World Cup, leaving Allen the sole out-and-out forward.

He has netted 23 of Tottenham's 36 league goals, and began averaging a goal a game last spring after finally overcoming a persistent ache in his thigh (it baffled specialists, including one who unsuccessfully operated for a her-

Then, hallelujah, a small piece of muscle was found to have detached from the bone. It was removed, and Allen's inhibitions went with it.

He finished last season with eight goals in seven games. Hun-ger is still there, so much so that he recently tossed his boots in a trash can after missing a third goal against Chelaca.

Those boots, he said, were worn through to the toes after 30 games. Ernie Allen might have turned in his grave. His boys shared a pair of boots because his wage as an asphalter (plus £1 a week as a strapping center-half who played Wednesdays, Satur-

days and Sundays) just about fed three sons and four daughters. Clive Allen's is the new world. He scored three times in his debut

as a 17-year-old for Queens Park

ROB HUGHES

managed after playing for Chel-sea and Tottenham. By 19, courtesy of the lunatic English soccer market, Allen was with his third club and under his

ninth manager after twice being sold for £1 million. In the summer of 1980, Arsenal paid a million for him — but 62 days later, without so much as one competitive game from him, dispatched him to Crystal Palace for national team fullback Kenny Sensom.

Maybe Allen was a pawn in Arsenal's pursuit of Sansom. More likely, his apparent lack of finesse and unenthusiastic training panicked Arsenal.

Terry Venables, then the Crystal Palace manager, had inside knowledge. Venables, now in mi-

lionaire residence as coach at Barcelona, grew up in the house op-posite the Allens' in Bonham

The instincts and street savvy Venables picked up there are succeeding in Barcelona, where internecine intrigues had chewed up and spat cut the best coaching brains of West Germany, the Netherlands and Argentina.

And the same Dagenham upbringing, the same humor that camouflaged penetrating cun-ning, is there in another neighborhood old boy, Ken Brown, now managing parochial Norwich City, which, against the odds, is up among the giants of the English League.

Bonham Road must have been a boy's soccer paradise. Another family produced Martin Peters, whose blind-side runs helped England win the 1966 World Cup.

One more? Just a little one: Jimmy Greaves, born a mile away, grew into the checkiest goal-poacher England has ever spell in Milan to set a single-sea-son Tottenham record of 37 goals, which is Allen's target

Contrary to England's customary disdain for yesterday's heroes, Greaves lives on popular memory and on his wits as a television

Must be something in the East End air - all that iron in the cars. and perhaps in the diet.

But where the Allens are concerned, it's in the blood. Ernie's contemporaries say he could have walked onto a top team if he'd had the opportunity and the in-centives now enriching his off-

His eldest son, Ron, played among England's best in the army, but broke a kneecap. Middle son Dennis played for Charl-ton, Reading and Bournemouth, and Les hit the jackpot with his Tottenham double.

But Clive is the first Allen to follow Greaves, Peters, Brown and Venables all the way from the neighborhood to the full England side. His first taste of international soccer came two years ago at the Maracana in Rio de Janeiro.

His cousin Paul Allen, a year younger at 24, is a hardworking creator rather than an instinctive scorer, but he is on the same Tottenham team (his first fame came as the youngest teenager to win an FA Cup medal with West Ham). Another cousin, Martin, plays regularly as a Queens Park de-

And still the family tree bears. Bradley, raised on big brother's exploits and his father's tales of glory, has a few months to decide with whom to place his future. His choice is simple; any club in

After Bradley? Uncle Ron of the busted knee reckons he has a gifted grandson, a 7-year-old re-bel who runs around in, of all colors, Liverpool's.

And then there's Oliver Thom as Allen - remember, you read it here first. Oliver, 12 weeks old, is the firstborn of Clive and Lisa Allen. A long shot? Granted, but even in the year 2001, it's odds-on that an Allen will be plying the

OBSERVER

Television Readership

By Russell Baker N EW YORK — Evidence piles on suggesting that television encourages people to read.

Serious thinkers, you may recall, used to say the tube would be the

death of the word, which shows that serious thinkers can be just as wrong as frivolous thinkers when they start telling us what it all means for generations yet unborn.

Their error was demonstrated one morning recently on the Donahue show when the words "obsessed with Michael Jackson" appeared at the bottom of a screen which was otherwise filled with an

I had just turned the set on, the way you do when you're looking for an excuse not to go to work Suppose they've just discovered Ju-piter is on a collision course with Earth. If so, going to work would

be rather pointless, wouldn't it? So I flicked the switch and the female adolescent appeared. Nor-mally I turn off televised adolescents immediately, since it's almost certain they are either going to sing something appalling or whine about the misery of being young. but as I reached for the drop-des button the words "obsessed with wichael Jackson" appeared.

The young woman apparently spent her waking hours thinking bout Jackson, a charming man met once in Los Angeles, where he presides over a national phone-in talk show for the ABC radio net-

Since his urbane, man-of-the-world charm, subtle wit and sophisticated insights into the modern predicament did not strike me as the sort of virtues that leave most adolescents "obsessed," I sat down to hear the case of this unusual girl.
Sitting there, I was pleased to think that if I were being televised at that instant, the words at the screen bottom might say "obsessed with obsessed adolescent."

Gradually, though, it became clear that the Michael Jackson who obsessed the poor girl was not ABC radio's Michael Jackson but a youthful crooner of the same name, and off went the telly.

Television relies more and more on these written captions to make itself interesting. The people seen complaining about life's inevitabilities every night on local TV news

growing custom of identifying them in print as "Trate Commute Abandoned Wife," "Disgruntled Sanitation Worker," and so on.

One TV news department in Washington specializes in showing film of body bags being removed from scenes of grief and violence. 'This station's news shows could relieve their monotony by putting some literature under the body-bag shots. For example: "Dead of Wife's Bedside Pistol," "Blasted While Robbing Gas Station,"
"Tangled With Escaped Lion,"
"Hit by Falling Airplane."

The most exciting advance for TV literature lately has been the pearance of Joe Isuzu, who amiably lies about the cars he's ped-dling. This is television so literate that it can make no sense at all to people who can't read.

It is the TV commercial as a joke about the mendacity of TV commercials. As Joe makes some outrageous claim for his Isuzu cars, written captions at the bottom of the screen say, "He's lying" and then literally spell out the facts after each lie he tells.

The joke and the effectiveness of the commercial both rely on the written messages that correct the lying pictures. If you can't read, there is no way to know what's

going on.
The success of Joe Isuzu is being ascribed to the growth of "cynicism" in the TV audience. "Cynicism" was once defined by Am-brose Bierce as "that blackguard defect of vision which compels us to see the world as it is instead of as it should be." The definition is aplicable here. Indeed, what Joe Isum finally acknowledges is what the TV sudience has long known: to wil, that television is an instrument for the promotion of lies.

Now, it says, so much of the sudience knows the sad truth that everybody can laugh about it. The question, of course, is, when will the news and the political ad-vertising move into TV's literate future? Surely President Resgan's recent televised efforts to explain his troubles away would have been far more successful if at the bottom

of the screen had appeared the words "Out to Lunch." New York Three Service

A Tempest in a Bordeaux Glass

By Frank J. Prial

New York Times Service
NEW YORK — Every year,
in late fall, a group of owners
of some of the better-known Bordeaux châteaus pack up their bottles and a few shirts and hit the road to plug their products. They call themselves the Union des Grands Crus de Bordeaux because they represent all the classified châteaus, as they are known, in the Bordeaux region. There are several thousand châteaus, but only 61 hold the classified status.

For this year's road show, the fourth since the Union was created, an impressive sampling of 52 of the best-known wines of Medoc, Saint-Emilion, Pomerol, Graves and Sauternes were to be offered at simultaneous tastings on Nov. 28 in Paris, London, New York and Montreal.

As in the past, the tastings, which are beld mostly for journalists and wine professionals, were to be coordinated by Steven Spurrier, the Paris and London wine merchant who also runs L'Acadé-mie du Vin, a Paris wine school with branches in London and New York. The tasting always marks the public debut of the pre-vious year's vintage, in this case 1985. Interest was high because 1985 had been billed as particu-

larly good.
Suddenly, the program was changed. Pierre Tan, the owner of Château Giscours and the current president of the Union des Grands Crus, announced that the Paris and London tastings had been canceled. It didn't take long to find out what had happene Bordeaux wines had been bested by some California wines in a comparative tasting in New York, and Tari was in a snit.

The story began 10 years ago in Paris. Spurrier had become fascinated by California wines and was curious to see how a group of them would do against the most famous Bordeaux wines. He arranged a tasting and invited some of France's best-known wine experts. They were not told they would be comparing French and American wines; presumably, they assumed that all the wines

When the smoke had cleared,

1973 Stag's Leap cabernet sanvig-non, It had topped, in order, Chi-4. 2. 3. 4. teau Mouton-Rothschild 1970, Châtean Haut-Brion 1970, Château Montrose 1970, Ridge Montebello 1971. Château-Léoville-Las-Cases, Mayacamas 1970, Clos du Val 1972, Heitz Martha's Vineyard 1970 and Freemark Ab-The French were not amused. Word spread that the California wines were big and fruity and showed well when young. Their own wines, the French noted, would reach their peak long after the American wines had faded.

So, last fall, Sporrier repeated the same tasting. The wines were the same, except for the Freemark Abbey, of which none remained. Ten years later, the French fared even worse. The Clos du Val 72 and the Ridge Montebello 71 came in first and second. The Montrose was third, followed by Léoville-Las-Cases, Mouton, Stag's Leap, Heitz, Mayacamas and, last, what must have been a poorty stored Haut-Brion.

The tasters were mostly Americans, but they also included Georges Lepré, sommelier at the Ritz in Paris, and Bartholomew Broadbent, the son of Michael Broadbent, the wine expert at Christie's in London.

Things might have ended there had not a reporter, Jean-Yves Nau. written a story in Le Monde, the Paris newspaper, saying in el-fect that enology had made such advances that fine wines were now made everywhere in the This was too much for Tari and

his group, so they canceled their show. The tastings would be held at some future date, said Philippe Guyonnet-Dupérat, the executive director of the Union, but without the involvement of L'Académie du Vin, which Guyonnet-Dupérat called "a commercial enterprise." "We wish to be free of all commercial influence," he added. In other words, since we don't like

the news, let's kill the messenger in this case, Steven Spurrier. Even more remarkable was a statement prepared for Le Monde by two Bordeaux proprietors of great renown, Jean-Michel Cazes

A tasting in Bordeaux.

celing the tasting made good sense, they said, because, among other things, Bordeaux-California tastings had become "the favorite diversion of American wine professionals, who use them as a sort of marketing tool."
The two Frenchmen described

such a comparison as "a permaneat trap" for French wines. "In playing down their losses and bragging about their occasional victories," they wrote, "our California rivals plan to boost their reputation, little by little, to the ights of the great Bordeaux."
"Bordeaux has been winning

parts of the overseas market, and certain wineries are in difficulty," Cazes and Prats continued. "The recent fall of the dollar has forced on the Californians the need to reorganize themselves. To do that, it is absolutely necessary for them to contest the supremacy of

competition. This current challenge is more serious, more pernicious, because it is cultural. In reducing wine to a product that can be measured 'scientifically,' these joyless tastings mix the world of taste with that of numbers. The Californians have proved that their wines have body. Have they also a soul?"

What can be said after a bar-rage such as that? Well, for one ng, I was one of the villains in the most recent of "these joyless tastings," and we all had a lot of fun - not because the Californians won but because it was a facinating intellectual exercise. What is more, the other judges continued to speak to me even after it was revealed that I had: listed a French wine, Château Montrose, first.

Moreover, Cazes and Prats may be wrong. There have been financial problems in California, it is true. Marginal operations great renown, Jean-Michel Cazes
of Château Lynch-Bages and Bruno Prats of Cos d'Estournel. Cando the great wines of Médoc fear
may go by the board. But the fine-

ly healthy.

Will we be able to say that about Bordeaux? With secondgrowth Bordeaux selling at about \$40 a bottle here, and with very little indication from the Médoc that any break in prices is imminent, how long can it be before the market collapses once again?

Abdallah H. Simon, the chairman of Seagram Vintners and the most influential of fine-wine importers in this country, recently warned Tari and his Union des Grands Crus colleagues that, un-less the prices of their 1986 wines were 25 to 30 percent below those of the 1985s, they would find no buyers here. And the United States represents 50 percent of the sales of some of the most famous wines, such as Latite-Rothschild.

The prices of Bordeaux wines have been increasing at a rapid rate in recent years. Until the dollar began to weaken in 1985, there seemed to be no limit to what Americans would pay. But now the franc is 50 percent more expensive than it was in the spring of 1985, and shipments of Bordeaux wines to the United States have slowed to a trickle.

So, it may not be California's problems that have made the Bordelais so prickly. There is this to say for the French position: They were not consulted before either tasting as to what wines would be used or what rules would be followed. To that extent, they have a right to feel that they were set up. In any event, it's unlikely that anybody from comparing California and Bordeaux wines. What's more, canceling opportunities to promote your own wines in an

does seem rather odd.

In fact, members of the Union des Grands Crus came to the United States in November anyway, and, as they usually do, traveled up and down the land promoting their wines. And, as they usually do, the Americans rectived their French friends warmly. In the end, impassioned rheto-ric is as quintessentially French as ric is as quinter good wine, and no one, French or American, is going to let one in-teriere with the other.

PEOPLE

Elton John's Surgery Said to Be Successful

Elton John, 39, is resting completed fortably after throat surgery that appears to have cured a problem that has plagued the singer for several months. The operation went very, very well and is successful," St. Vincent's Private Hospital in Sydney said in a statement. "It is hoped he will not need further surgery." Dr. John Tonkin, a throat surgeon, said the British entertsin-er would not be able to sing for several months. The hospital, at John's request, would not reveal his ailment but a spokeswoman con-firmed that the singer had bad a biopsy. . . Frankie Vanghan, 59. left a London hospital Monda eight days after surgery for a burst appendix and peritonitis and said he was "deeply upset" to be dropped from his starring role in the musical "42nd Street." The show's executive producer, Helen Montagu, said Vaughan's contract had been terminated because "be was too ill to carry the burden of a big musical."

The "Dallas" star Victoria Principal has sued Joan Rivers for \$3 million, claiming the talk show hostess went too far when she blurted out the actrest's unlisted home phone number on the air. In the suit, filed Monday in Los Angeles, Principal said Rivers was interviewing the "Dallas" co-star Ker. Kercheval Dec. 15 when she trie repeatedly to reach Principal, intending to ask her "embarrassies" questions about her personal and givate life." As millions watched Rivers announced Principal's number on the air, the suit said, resulting in a flood of calls to the actress

A 195-year-old sample of Madei-ra wine drew mixed reviews during a tasting to celebrate a wedding anniversary. Napoleon reportedly took the 1792 Madeira with him when he sailed into exile on St. Helena, but it was Jackson Stranck who uncorked the dark amber wine Sunday in Morro Bay, California. "My God, that's dry!" Strauch exdicates it needs a lot more time — I would say a century." Strauch and wife Catherine bought the wine Oct. 23 at a Christie's auction in London for \$467 and poured one-ounce tastes for 12 friends during their 13th anniversary celebration;
